Project Name:
EOS Ageera Goor

Plan Name:
Layout Plan

Scale: **1: 100**

No.:
01

A few notes regarding the location plan:

1. The final location of the facility must be coordinated according to the location of the electrical room and the efficiency of the electrical line location between the storage facility and the electrical room.
2. Distances between accessories must be examined in accordance with the standard. The distances proposed in the plan are recommended distances that relate to the operation of the equipment after installation.
3. The foundation of the concrete surfaces must be planned in accordance with the recommendations of a structural engineer.
