# INTRODUCTIE

## INTRODUCTIE

*"RIEKERHOF, EEN PLEK VOOR GROEN, ONTMOETING EN DAGELIJKS VERKEER."*

De renovatie van het gebouw Riekerhof zal dienen als een zorghuis voor intramurale zorg aan ouderen. Het huidige woon- en zorgcentrum aan de Johan Jongkindstraat zal gerenoveerd worden naar een 9 verdieping hoog tellend gebouw. Het gebouw is omringt met groen en een bossage in eigendom van de gemeente Amsterdam. In de vernieuwde ontwikkeling zal er binnen- en buiten landschap geïntegreerd worden waar ruimte is voor groen, ontmoeting en dagelijks verkeer.

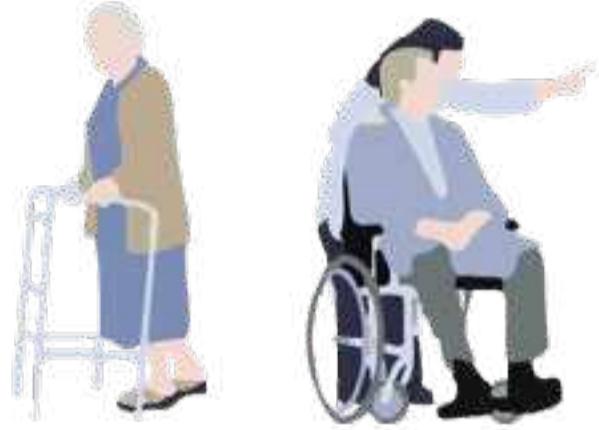

# NATURE TO NURTURE

*"... door te genieten van een groen landschap maak je zonder vermoeidheid gebruik van de geest, het kalmeert je ondanks dat je er levendig van wordt; en zo heeft het, door de invloed van de geest op het lichaam, een positief effect op je energie en geeft het hernieuwde kracht aan je hele systeem."*

*Tijdens contact met de natuur rust onze prefrontale cortex - de commandokamer van de hersenen - een veelgebruikte spier.*

## DOELGROEP // OUDEREN

### BEHOEFTEN

- De ruimte om een rondje tussen het groen te wandelen
- Een plek om te zitten met familieleden
- Een plek om je buren te ontmoeten
- Een plek om te genieten van de natuurlijke omgeving
- Een plek om rustig te wachten op je vervoer
- Een vriendelijke omgeving met veel groen

## DOEL

*"EEN PLEK CREEËREN VOOR  
ONTMOETING, GROEN EN  
DAGELIJKS VERKEER WAARDOOR  
ER MET GEMAK, RUST EN  
COMFORT AAN DE LICHAMELIJKE  
EN PSYCHOLOGISCHE  
GEZONDHEID VAN DE OUDEREN  
GEWERKT KAN WORDEN "*

### Bewezen voordeelen van tuinen op de gezondheid

- Minder stress, vooral in verband met lichamelijke activiteit
- Verhoogde mobiliteit
- Vermindering van pijn
- Verhoogde algemene tevredenheid
- Hogere kwaliteit van leven

RIEKERHOF

# BUITEN LANDSCHAP

DISCLAIMER • Drawing measurements are approximate and are for illustrative and consultative purposes only. • Contractors and manufacturers shall verify and be responsible for all dimensions and conditions on the job and inform MOSS of all variations from the drawing prior to performance of work. • These designs have been generated for the clients listed in the project name and are not to be used, reproduced, copied or distributed for any other project without written permission from MOSS Amsterdam. • MOSS shall first see and approve contractors full size shop drawings prior to any fabrication. • The design drawings herewith represent design intent only. • It is the responsibility of the fabricator to verify and insure structural integrity of the design with a licensed structural engineer, and assure that all local codes and regulations are fulfilled. • The fabricator has the final responsibility for a full working landscape / garden. • The fabricator is responsible to fabricate gardens of a high quality. • Use of these designs constitutes compliance with the above terms.

## BUITEN LANDSCHAP

### ONTWERP PRINCIPES

#### CONNECTIE

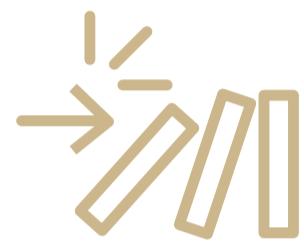

- Maak groen zichtbaar vanaf elke woning.
  - Creëer plekken waar mensen samen kunnen komen tussen het groen.
  - Door grote verscheidenheid aan planten met dezelfde behoeftes samen te zetten, ontwikkel je goed werkende ecosystemen voor een gezonde leefomgeving.
- ↓  
↓  
↓  
↓

Onderzoek toont aan dat het psychologisch en fysiologisch fundamenteel is voor de mens om regelmatig in contact te staan met natuur.

#### ECOLOGIE

- Vegetatie op basis van lokale vaste planten zoals grassen en struiken die biodiversiteit aantrekken.
- Pas geschikte waardplanten toe voor de reproductie van vlinders.
- Om de biodiversiteit te vergroten worden natuurlijke insecten hotels zoals boomstammen toegepast.

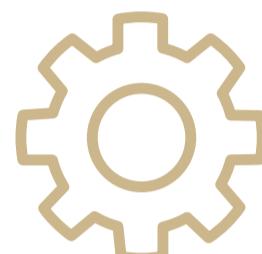

#### IMPACT

- Werk met eyecatchers om de aandacht op bepaalde gebieden te vestigen.
- Zorg voor een groen gebaar bij de entree gebieden van het gebouw.
- Creëer impact door buiten en binnen met elkaar te verbinden.

#### WATER MANAGEMENT

- Groene daken zorgen voor waterbuffering op de daken.
- Het waterpeil op het maaiveld bepaalt de plaatsing van de bomen.
- Uitgangspunt bij de keuze voor groen is te werken met lokale planten, of vergelijkbare soorten. Hierdoor kunnen de groengebieden gedurende alle seizoenen van het jaar volledig afhankelijk zijn van lokale neerslag (conform WAT 6). Er wordt ook naar gespecificeerde plantlijsten gekeken die voornamelijk bestaan uit soorten die gedijen in warme en droge omstandigheden.

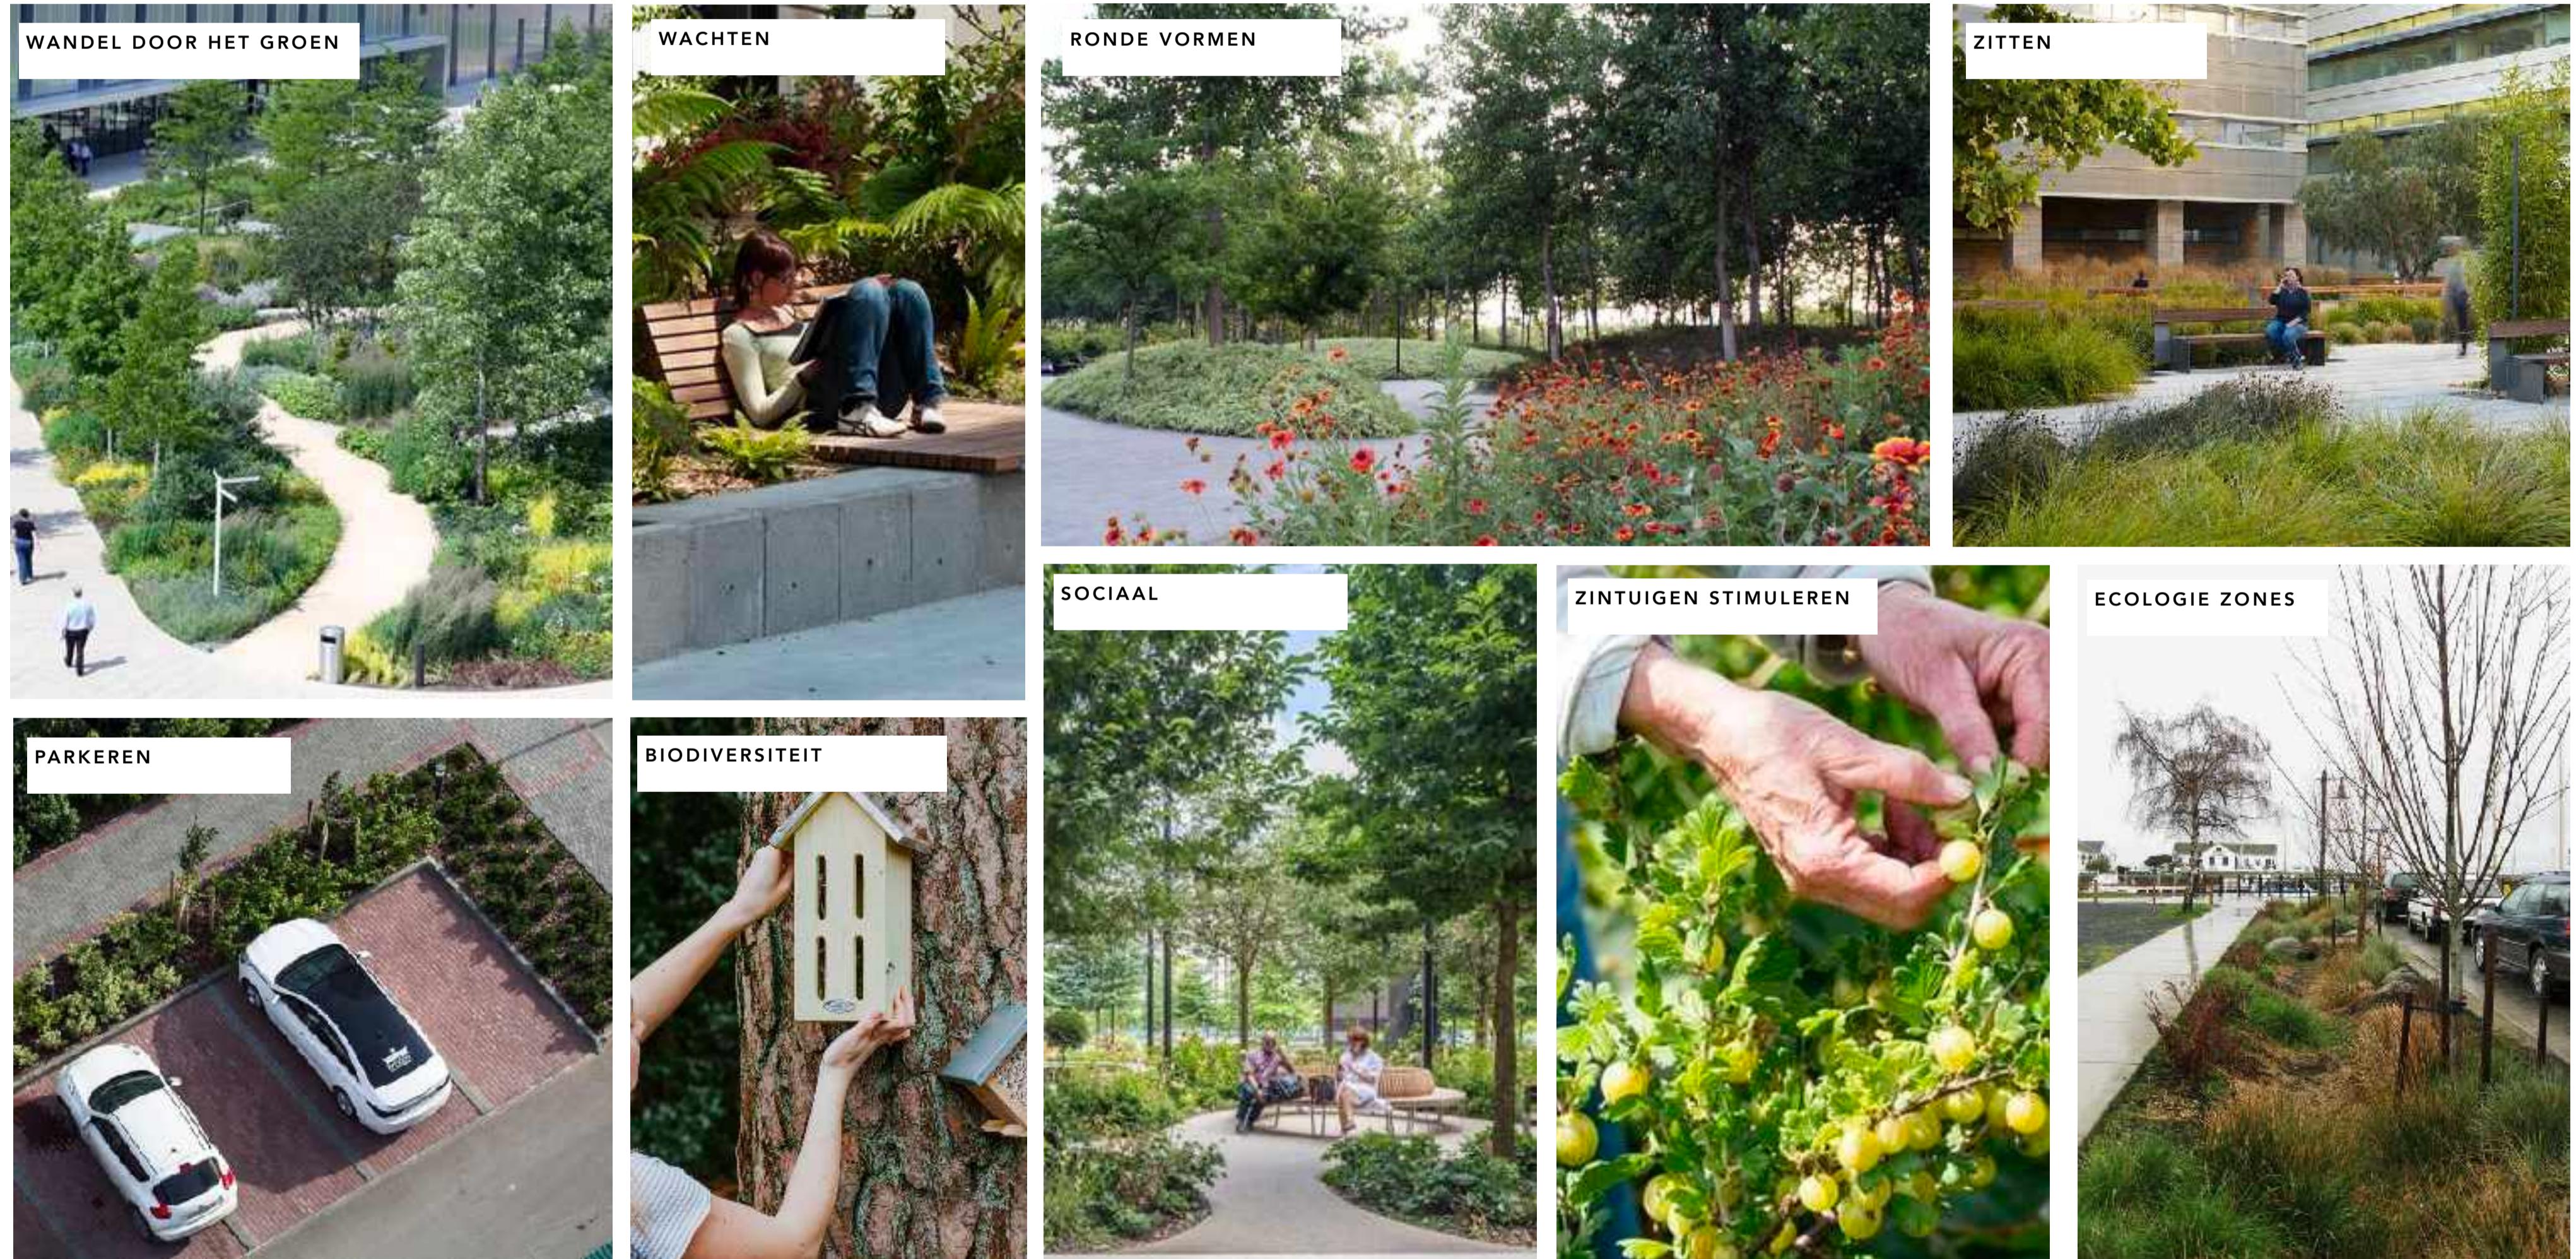

#### FUNCTIE

- Gebruik groen om het programma en functie van het gebouw te ondersteunen. Verbind buiten met binnen door het gebruik van groen.
  - Gebruik groen niet alleen vanuit een esthetisch oogpunt maar ook voor de functionaliteit in bijv. het opvangen van regenwater, het verkoelen van de leefomgeving etc.
- ↓  
↓  
↓  
↓

Groen kan een gevoel van comfort, schaal, intimiteit of zelfs samenwerking creëren. Sommige groene elementen helpen een circulatie zone te leiden, terwijl andere een ruimte verdelen.

## BUITEN LANDSCHAP

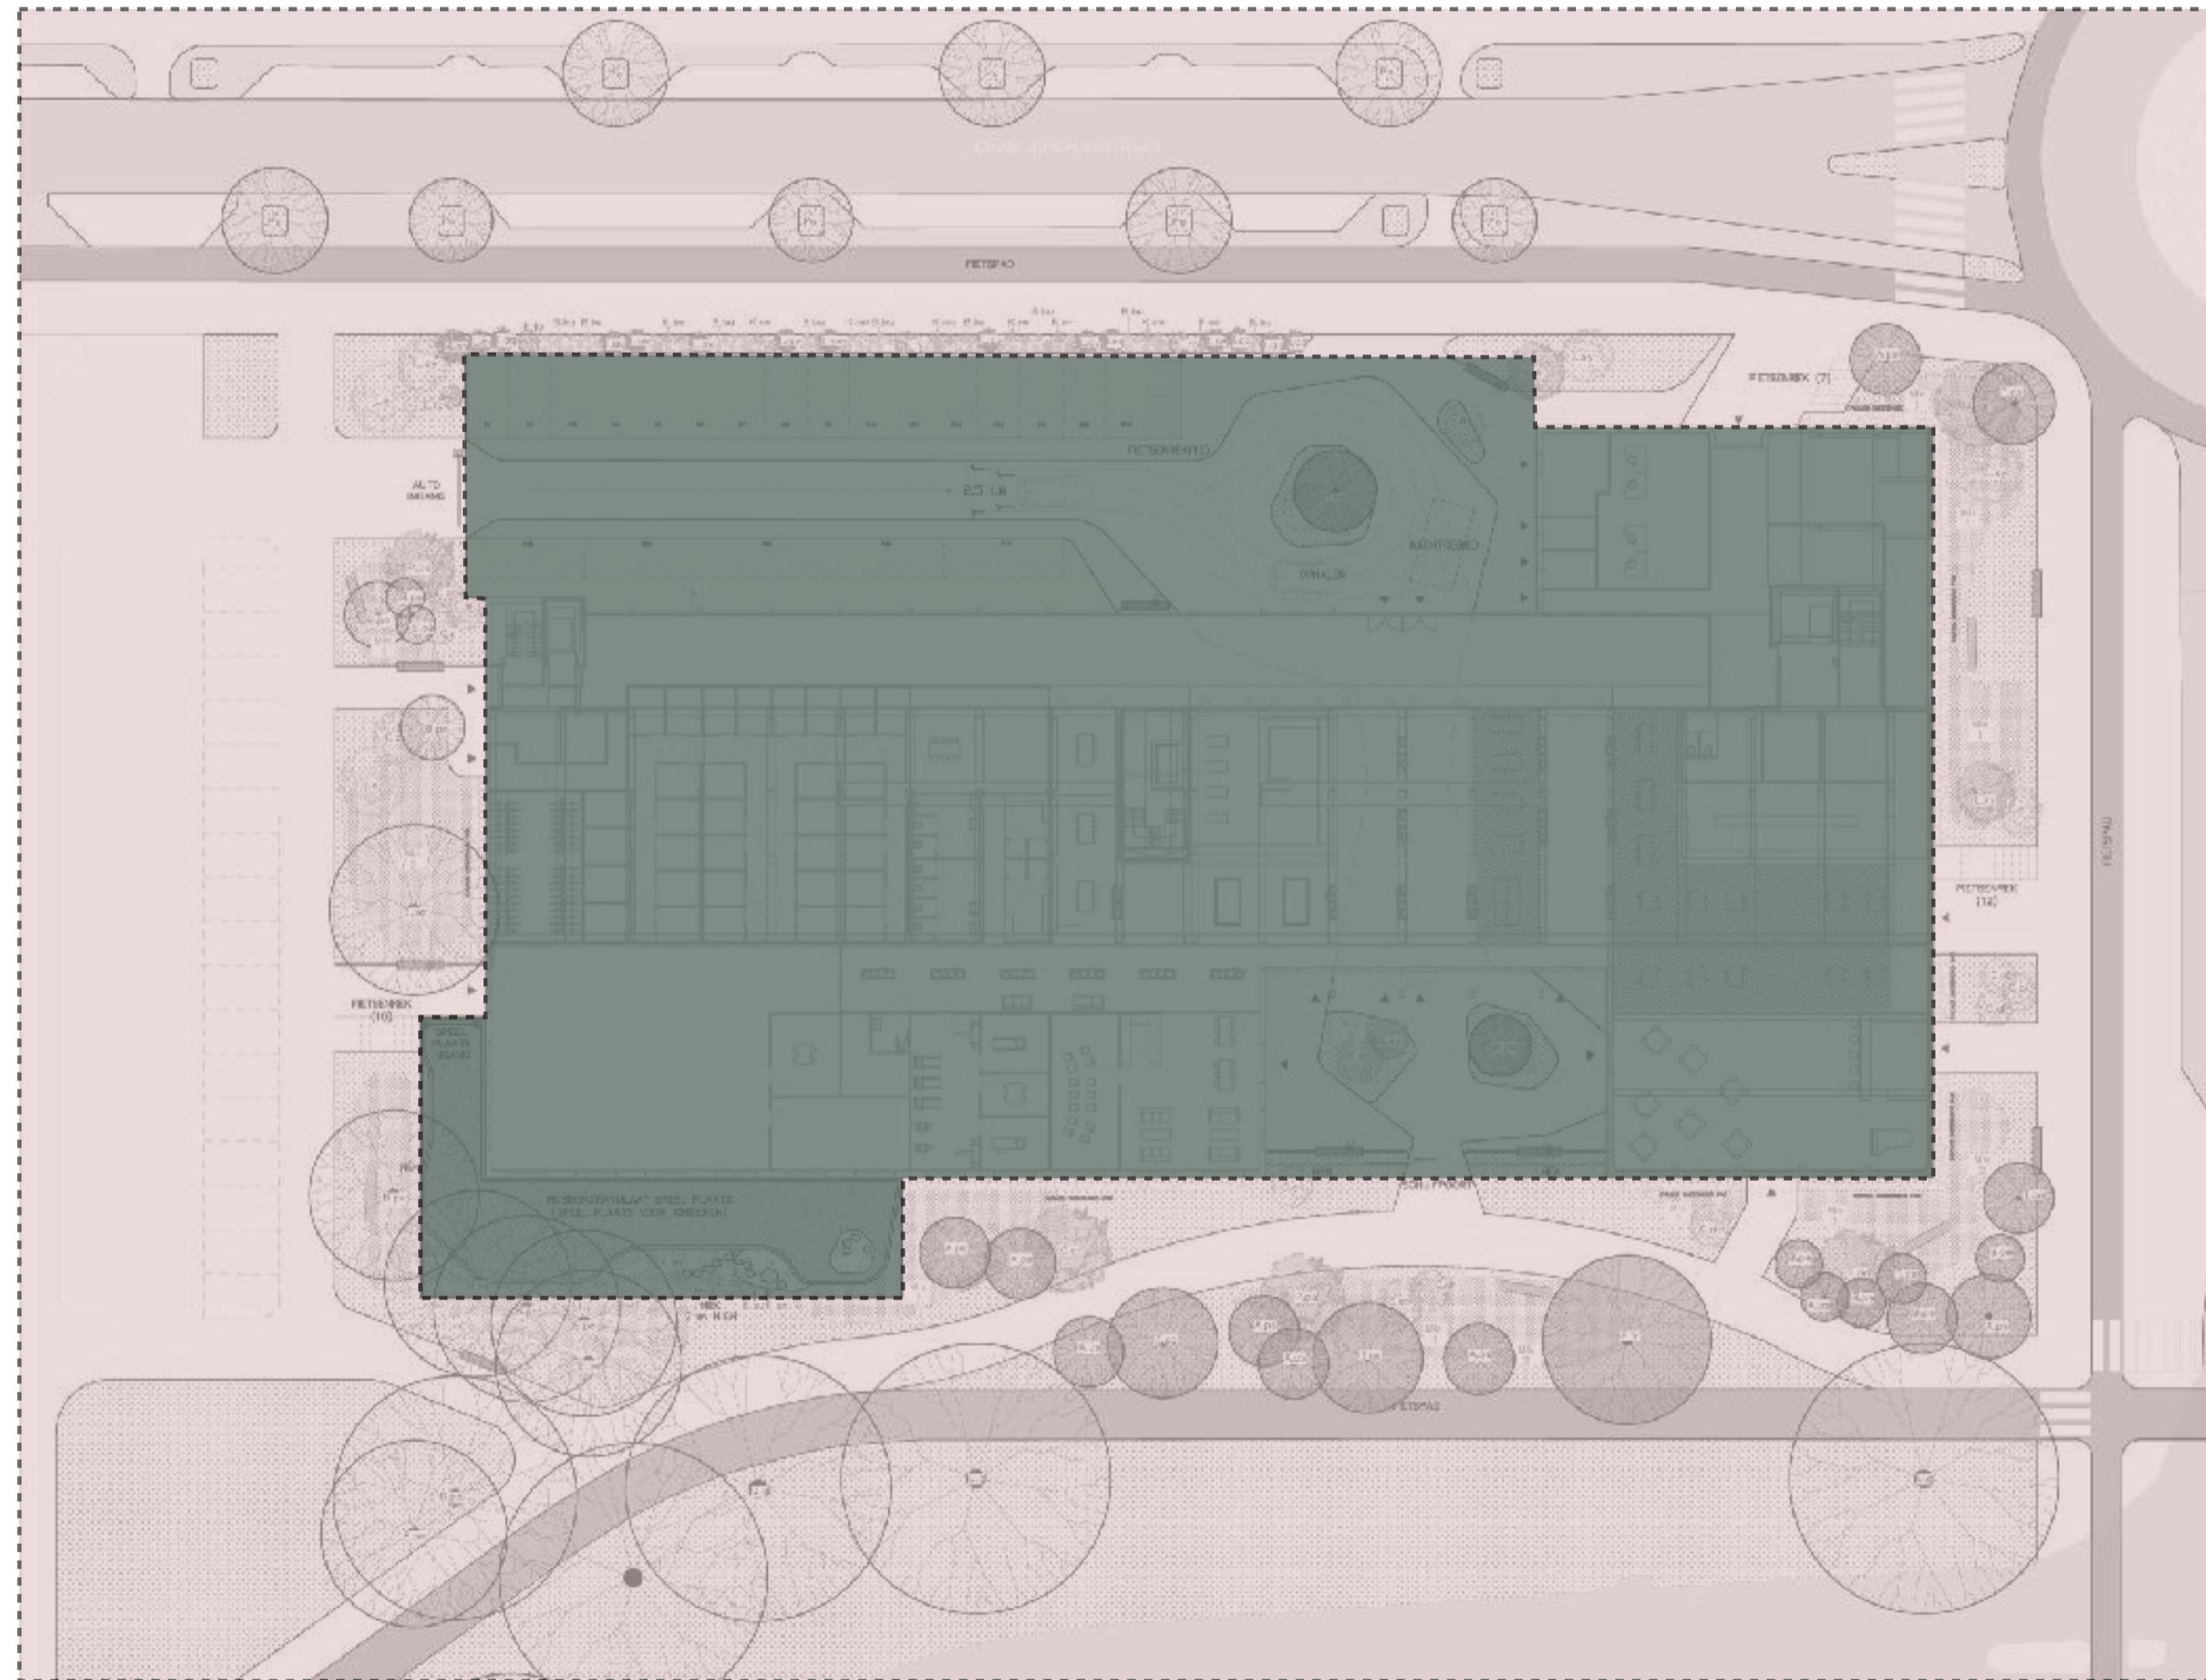

### PROGRAMMA

DISCLAIMER • Drawing measurements are approximate and are for illustrative and consultative purposes only. • Contractors and manufacturers shall verify and be responsible for all dimensions and conditions on the job and inform MOSS of all variations from the drawing prior to performance of work. • These designs have been generated for the clients listed in the project name and are not to be used, reproduced, copied or distributed for any other project without written permission from MOSS Amsterdam. • MOSS shall first see and approve contractors full size shop drawings prior to any fabrication. • The design drawings herewith represent design intent only. • It is the responsibility of the fabricator to verify and insure structural integrity of the design with a licensed structural engineer, and assure that all local codes and regulations are fulfilled. • The fabricator has the final responsibility for a full working landscape / garden. • The fabricator is responsible to fabricate gardens of a high quality. • Use of these designs constitutes compliance with the above terms.

RIEKERHOF

# BEPLANTING BEGANE GROND

## GROENE STAPPEN NAAR EEN GEZOND ECOSYSTEEM

TUINEN

Het creëren van een gezonde omgeving en ecosysteem voor zowel mensen als dieren en kleine micro-organismen begint met het toevoegen van **PLANTEN**. Het toevoegen van grassen, bloeiende vaste planten, struiken en bomen zal niet alleen esthetische waarde geven, maar het zal ook regenwater bufferen op het terrein, een positieve invloed hebben op het stedelijk hitte-eilandeffect, het gebouw koelen in de zomer, wilde dieren aantrekken en sociale activiteiten en mentaal welzijn verhogen.

INHEEMS EN BLOEIEND

Om de biodiversiteit te bevorderen en lokale soorten te ondersteunen voegen we **INHEEMSE BEPLANTING** toe aan de tuinen. Dit kan variëren van inheemse bomen en struiken tot wilde bloemenweides met soorten die zorgvuldig zijn geselecteerd op basis van de locatie van het project. Het belangrijkste doel is een lang **BLOEISEIZOEN** van het vroege voorjaar tot het late najaar om de fauna van nectar te voorzien wanneer zij actief is.

NATUUR INCLUSIEF

Het toevoegen van alleen planten in tuinen is misschien niet genoeg om meer wilde dieren aan te trekken. Afhankelijk van de soorten die we in de tuin willen verwelkomen, integreren we **NATUURLIJKE ELEMENTEN** zoals houten boomstammen, grindeilanden of stenen om wilde dieren te laten schuilen of als habitat te gebruiken. Op die manier zal de bezoekende fauna, die door de beplanting wordt aangetrokken, er misschien zelfs hun thuis van maken.

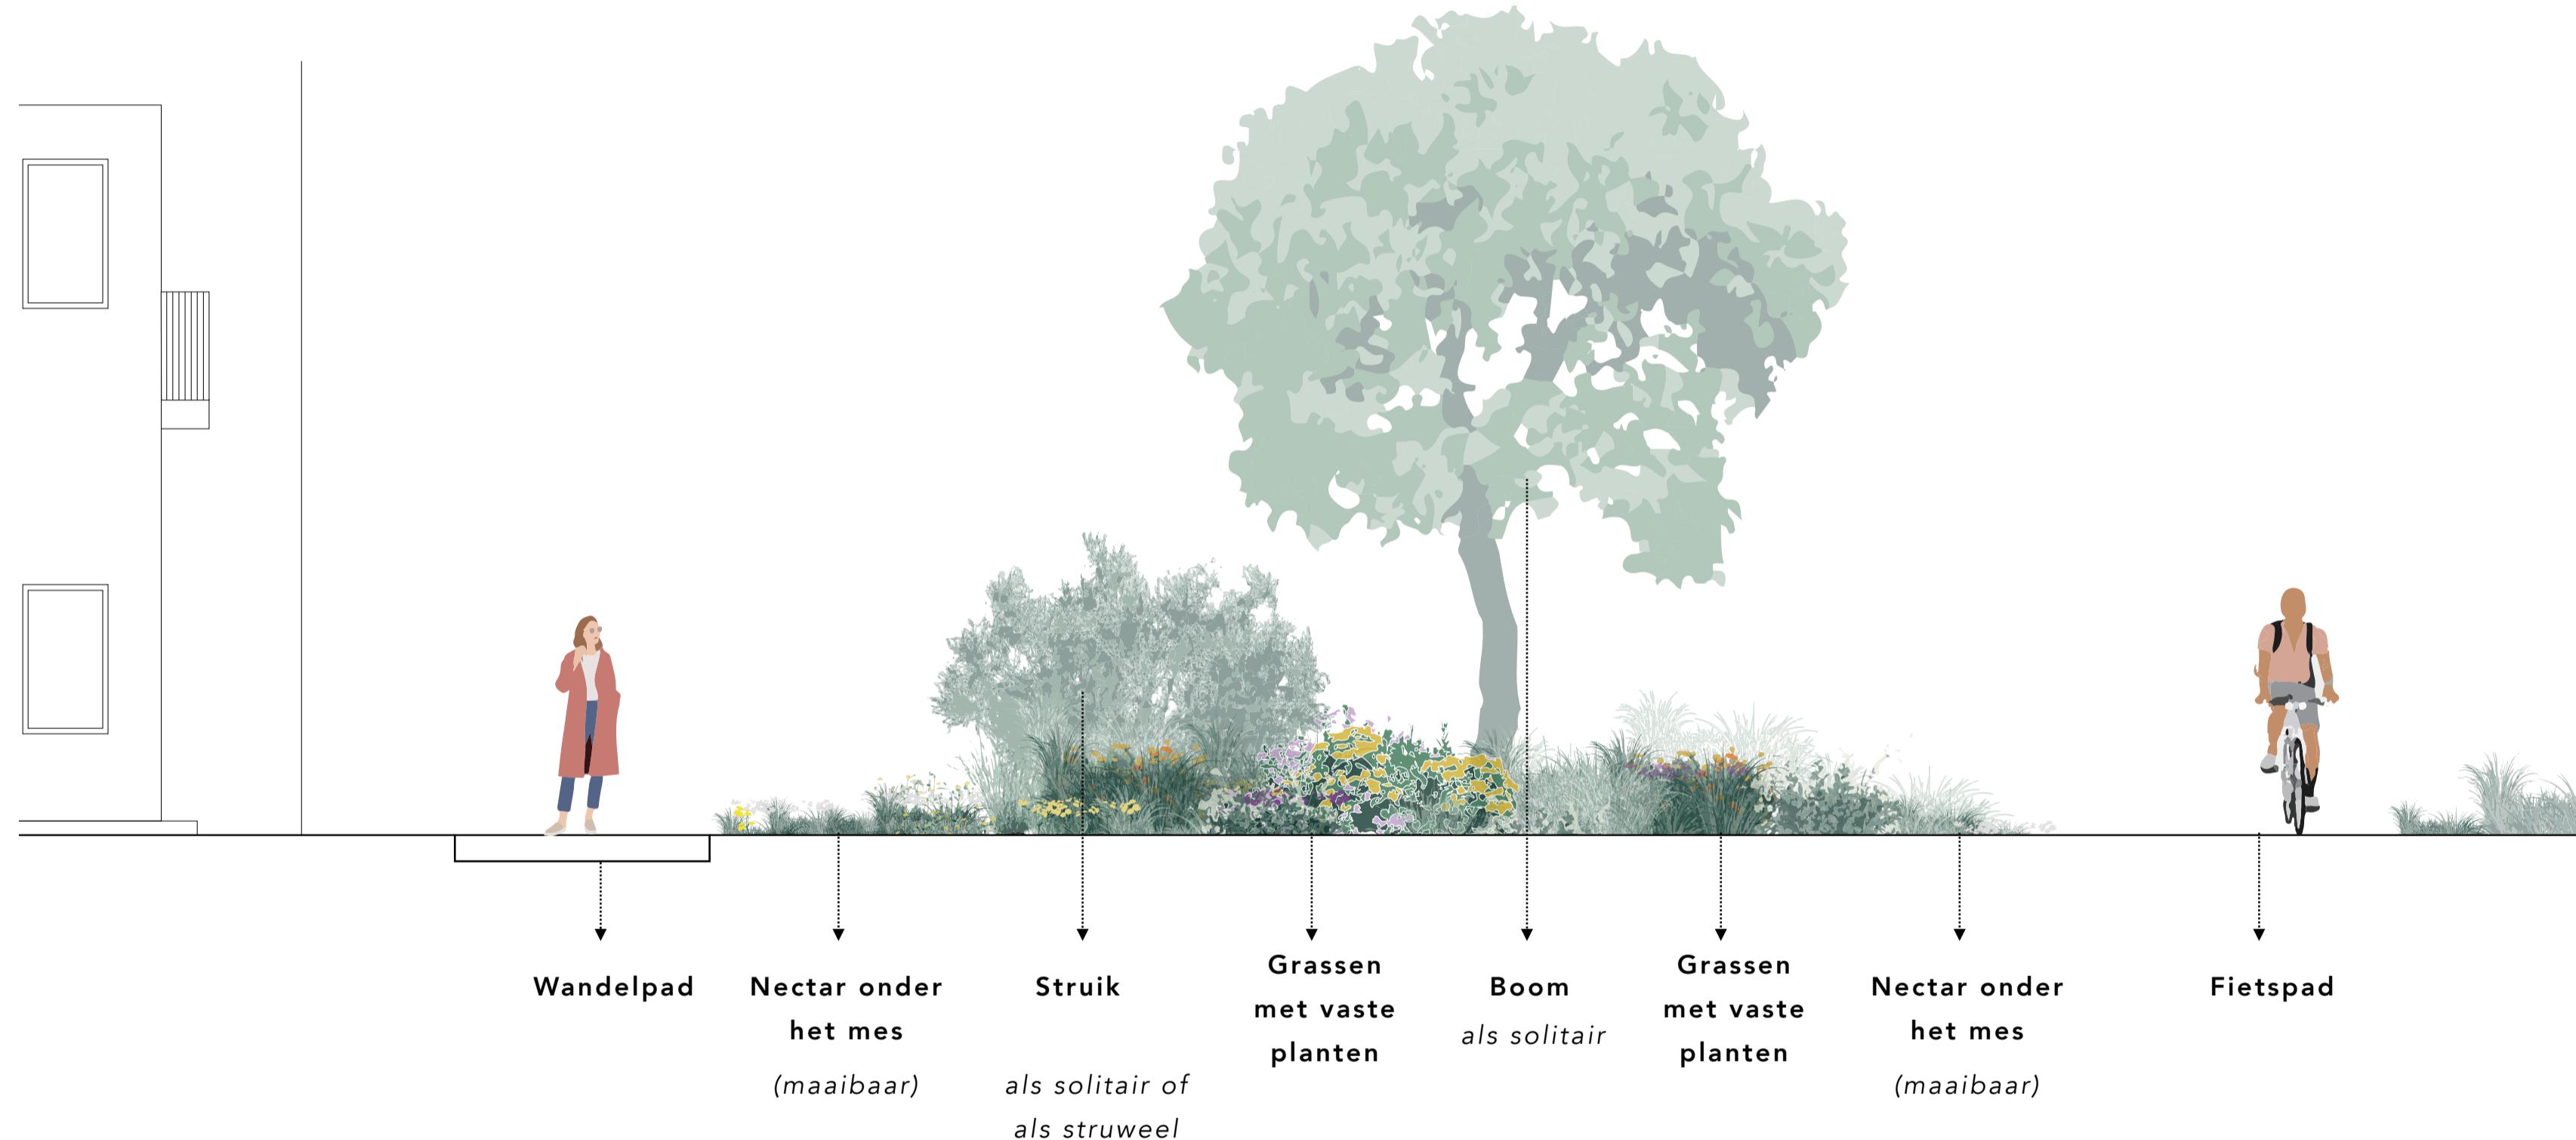

GROTERE BIODIVERSITEIT

Het creëren van een gevarieerde tuin met de eerder genoemde elementen zal het leven in de (dak)tuin een kickstart geven. Bloemenplanten trekken **INSECTEN** aan, struiken met bessen en ook **VOGELS** zullen hun weg vinden. Al dit leven zal zijn weg vinden in de tuin waar de **MENS** zijn tijd doorbrengt door te genieten van het groen, van de zon, van een praatje met de buurman en van de rust en stilte in een drukke stad.

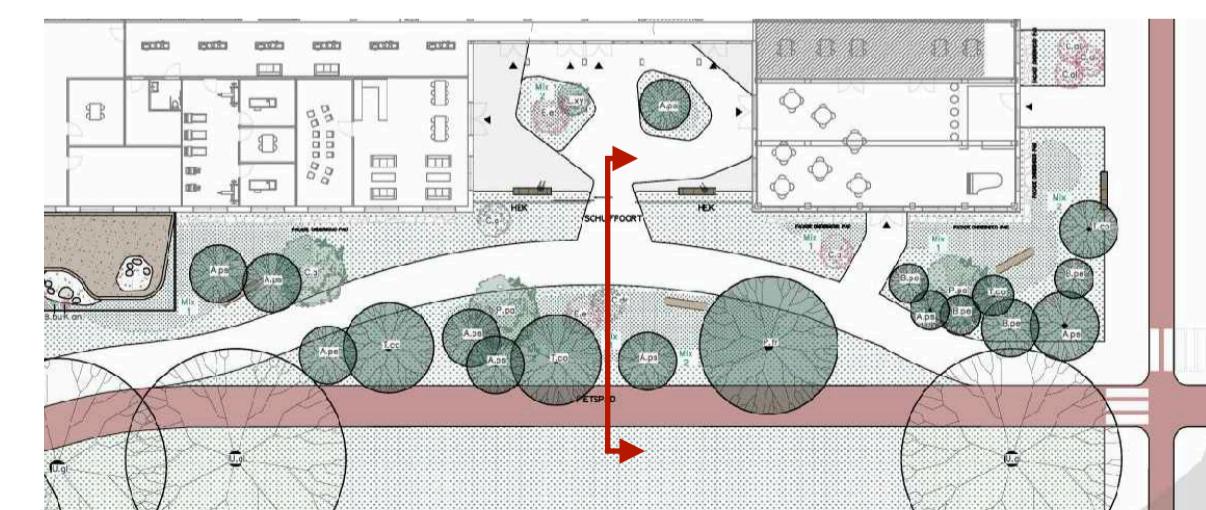

## BEPLANTING

### GROEN CONCEPT

Gelaagd groen met een focus op ecologie en biodiversiteit. Waar dooruit het grootste deel van het jaar bloeiend groen te zien is. Het groenconcept bestaat uit 4 'lagen' op verschillend schaalniveaus. Meer uitleg over de lagen is te vinden op de volgende pagina's.

- LAAG 1 : NECTAR ONDER HET MES**
- LAAG 2 : GRASSEN MET VASTE PLANTEN**
- LAAG 3 : STRUIKEN**
- LAAG 4 : BOMEN**

DISCLAIMER • Drawing measurements are approximate and are for illustrative and consultative purposes only. • Contractors and manufacturers shall verify and be responsible for all dimensions and conditions on the job and inform MOSS of all variations from the drawing prior to performance of work. • These designs have been generated for the clients listed in the project name and are not to be used, reproduced, copied or distributed for any other project without written permission from MOSS Amsterdam. • MOSS shall first see and approve contractors full size shop drawings prior to any fabrication. • The design drawings herewith represent design intent only. • It is the responsibility of the fabricator to verify and insure structural integrity of the design with a licensed structural engineer, and ensure that all local codes and regulations are fulfilled. • The fabricator has the final responsibility for a full working landscape / garden. • The fabricator is responsible to fabricate gardens of a high quality. • Use of these designs constitutes compliance with the above terms.

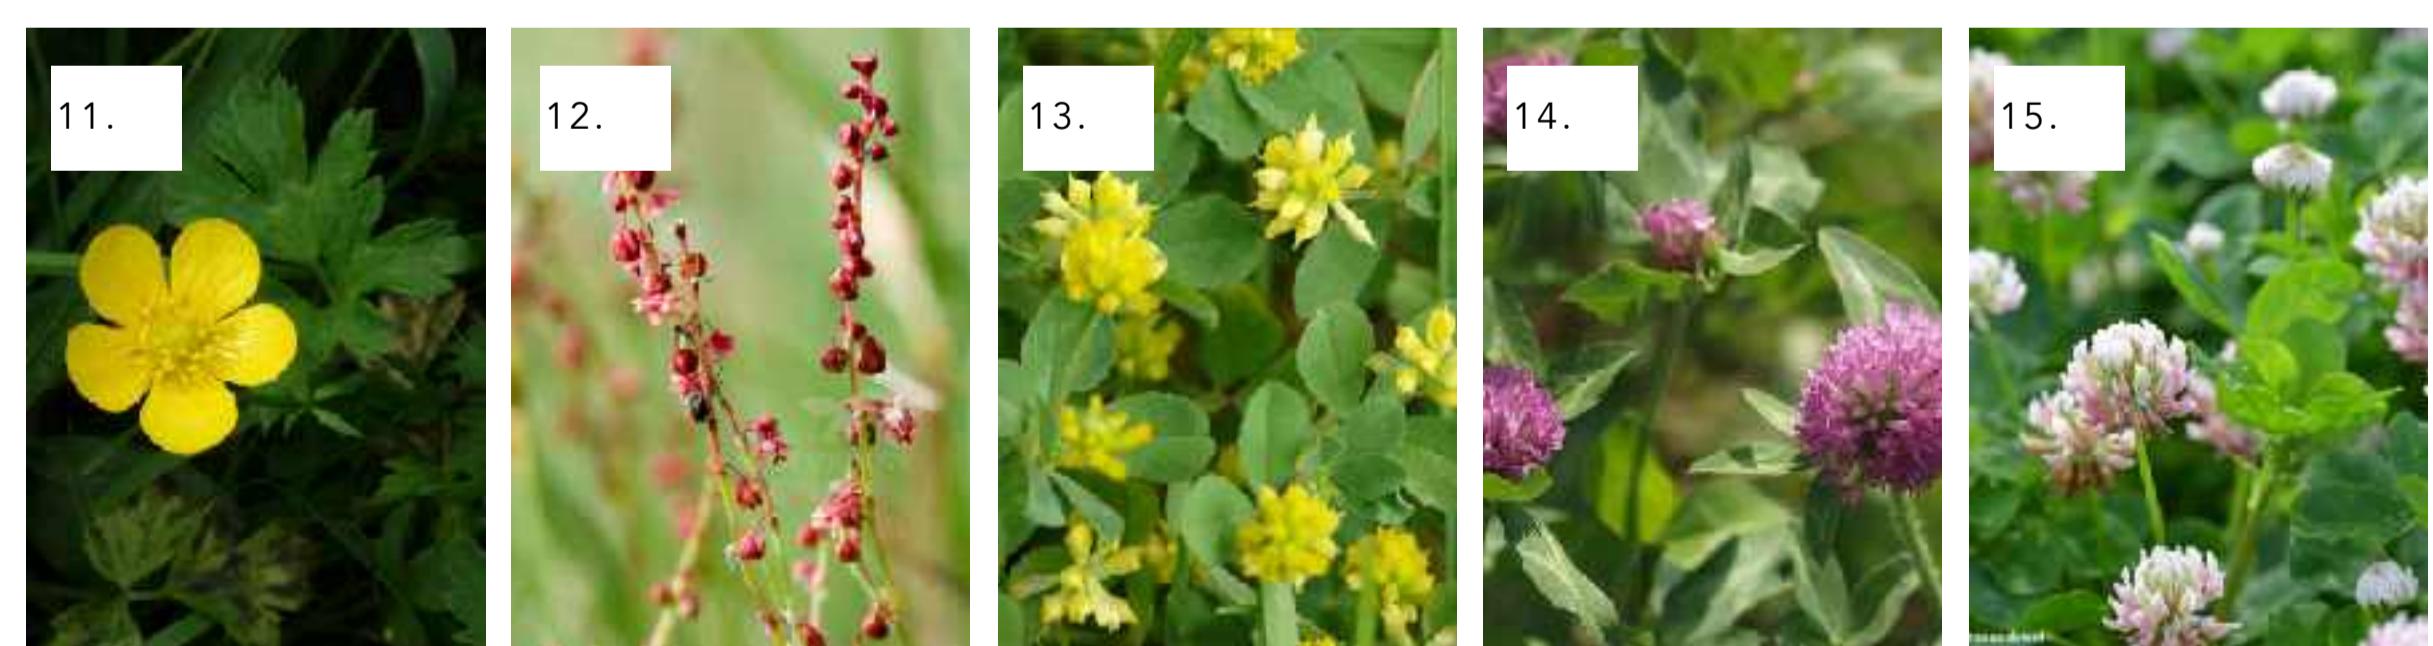

## BEPLANTING - LAAG 1

### NECTAR ONDER HET MES

**Nectar onder het mes** is een vegetatie die regelmatig kan worden gemaaid (tot 5x per jaar) waardoor de randen langs paden er wel strak uitzien. Gelijktijdig zijn aan dit mengsel soorten toegevoegd die na afmaaien al snel weer bloeien, waardoor ook deze stroken een bijdrage aan de nectar voorziening leveren.

Een bloemenmengsel dat meegezaaid kan worden met reguliere gazongrasmengsels. De volgende kruiden worden ingezaaid (zowel eenjarige als meerjarige kruiden) (onderstreept zijn waardplanten):

1. Madeliefje
2. Pinksterbloem
3. Klein streepzaad
4. Gewone reigersbek
5. Gewoon biggenkruid
6. Vertakte leeuwentand
7. Gewone rolklaver
8. Hopklave
9. Smalle weegbree
10. Gewone brunel
11. Kruipende boterbloem
12. Schapenzuring
13. Kleine klaver
14. Rode klaver

DISCLAIMER • Drawing measurements are approximate and are for illustrative and consultative purposes only. • Contractors and manufacturers shall verify and be responsible for all dimensions and conditions on the job and inform MOSS of all variations from the drawing prior to performance of work. • These designs have been generated for the clients listed in the project name and are not to be used, reproduced, copied or distributed for any other project without written permission from MOSS Amsterdam. • MOSS shall first see and approve contractors full size shop drawings prior to any fabrication. • The design drawings herewith represent design intent only. • It is the responsibility of the fabricator to verify and insure structural integrity of the design with a licensed structural engineer, and ensure that all local codes and regulations are fulfilled. • The fabricator has the final responsibility for a full working landscape / garden. • The fabricator is responsible to fabricate gardens of a high quality. • Use of these designs constitutes compliance with the above terms.

## BEPLANTING - LAAG 2

### SIERGRASSEN EN VASTE PLANTEN

Calamagrostis 'Karl Foerster'

Euphorbia palustris

Echinacea purpurea

Agastache 'Blue fortune'

Stipa gigantea

Persicaria amplexicaulis 'Alba'

Foeniculum vulgare

Achillea millefolium

Miscanthus sinensis 'Gracillimus'

#### Uiterlijk

- Beweging
- Kleur & zachtheid
- Structuur in zomer & winter
- Wintergroene soorten gecombineerd met zomersoorten
- Verscheidenheid in hoogte

Grassen zijn gegroepeerd in 2 categorieën. De groepen zijn verdeeld over de plattegrond in relatie tot de geplaatste struiken

#### Mix 1

- Foeniculum vulgare
- Euphorbia palustris
- Agastache 'Blue fortune'
- Achillea millefolium
- Calamagrostis 'Karl Foerster'

#### Mix 2

- Echinacea purpurea
- Stipa gigantea
- Persicaria amplexicaulis 'Alba'
- Achillea millefolium
- Miscanthus sinensis 'Gracillimus'

DISCLAIMER • Drawing measurements are approximate and are for illustrative and consultative purposes only. • Contractors and manufacturers shall verify and be responsible for all dimensions and conditions on the job and inform MOSS of all variations from the drawing prior to performance of work. • These designs have been generated for the clients listed in the project name and are not to be used, reproduced, copied or distributed for any other project without written permission from MOSS Amsterdam. • MOSS shall first see and approve contractors full size shop drawings prior to any fabrication. • The design drawings herewith represent design intent only. • It is the responsibility of the fabricator to verify and insure structural integrity of the design with a licensed structural engineer, and assure that all local codes and regulations are fulfilled. • The fabricator has the final responsibility for a full working landscape / garden. • The fabricator is responsible to fabricate gardens of a high quality. • Use of these designs constitutes compliance with the above terms.

## BEPLANTING - LAAG 3

### STRUIKEN

Bij de struiken wordt er uitgegaan van het gebruik van inheemse soorten, het liefste met een autochtone herkomst (NL-genenmateriaal). De volgende struiken kunnen worden ingebracht:

- Op zonrijke locaties: *Clethra Alnifolia*, *Prunus padus* en *Euonymus europaeus*
- Op schaduwrijke locaties: *Cornus alba*, *Lonicera xylosteum* en *Cornus asperifolia* var. *drummondii*
- Voor de natuurlijke heg aan de noordzijde - *Ligustrum ovalifolium*, *Ilex aquifolim* en *Hydrangea anomala sub. petiolaris* te gebruiken in 3 rijen

Belangrijk: indien in het gebouw nestlocaties voor de huismus worden aangebracht is het belangrijk rond het gebouw struweel te hebben waarin de huismussen kunnen schuilen tegen predatie.

NATUURLIJKE HEG

DISCLAIMER • Drawing measurements are approximate and are for illustrative and consultative purposes only. • Contractors and manufacturers shall verify and be responsible for all dimensions and conditions on the job and inform MOSS of all variations from the drawing prior to performance of work. • These designs have been generated for the clients listed in the project name and are not to be used, reproduced, copied or distributed for any other project without written permission from MOSS Amsterdam. • MOSS shall first see and approve contractors full size shop drawings prior to any fabrication. • The design drawings herewith represent design intent only. • It is the responsibility of the fabricator to verify and insure structural integrity of the design with a licensed structural engineer, and assure that all local codes and regulations are fulfilled. • The fabricator has the final responsibility for a full working landscape / garden. • The fabricator is responsible to fabricate gardens of a high quality. • Use of these designs constitutes compliance with the above terms.

**BESTAANDE BOMEN**

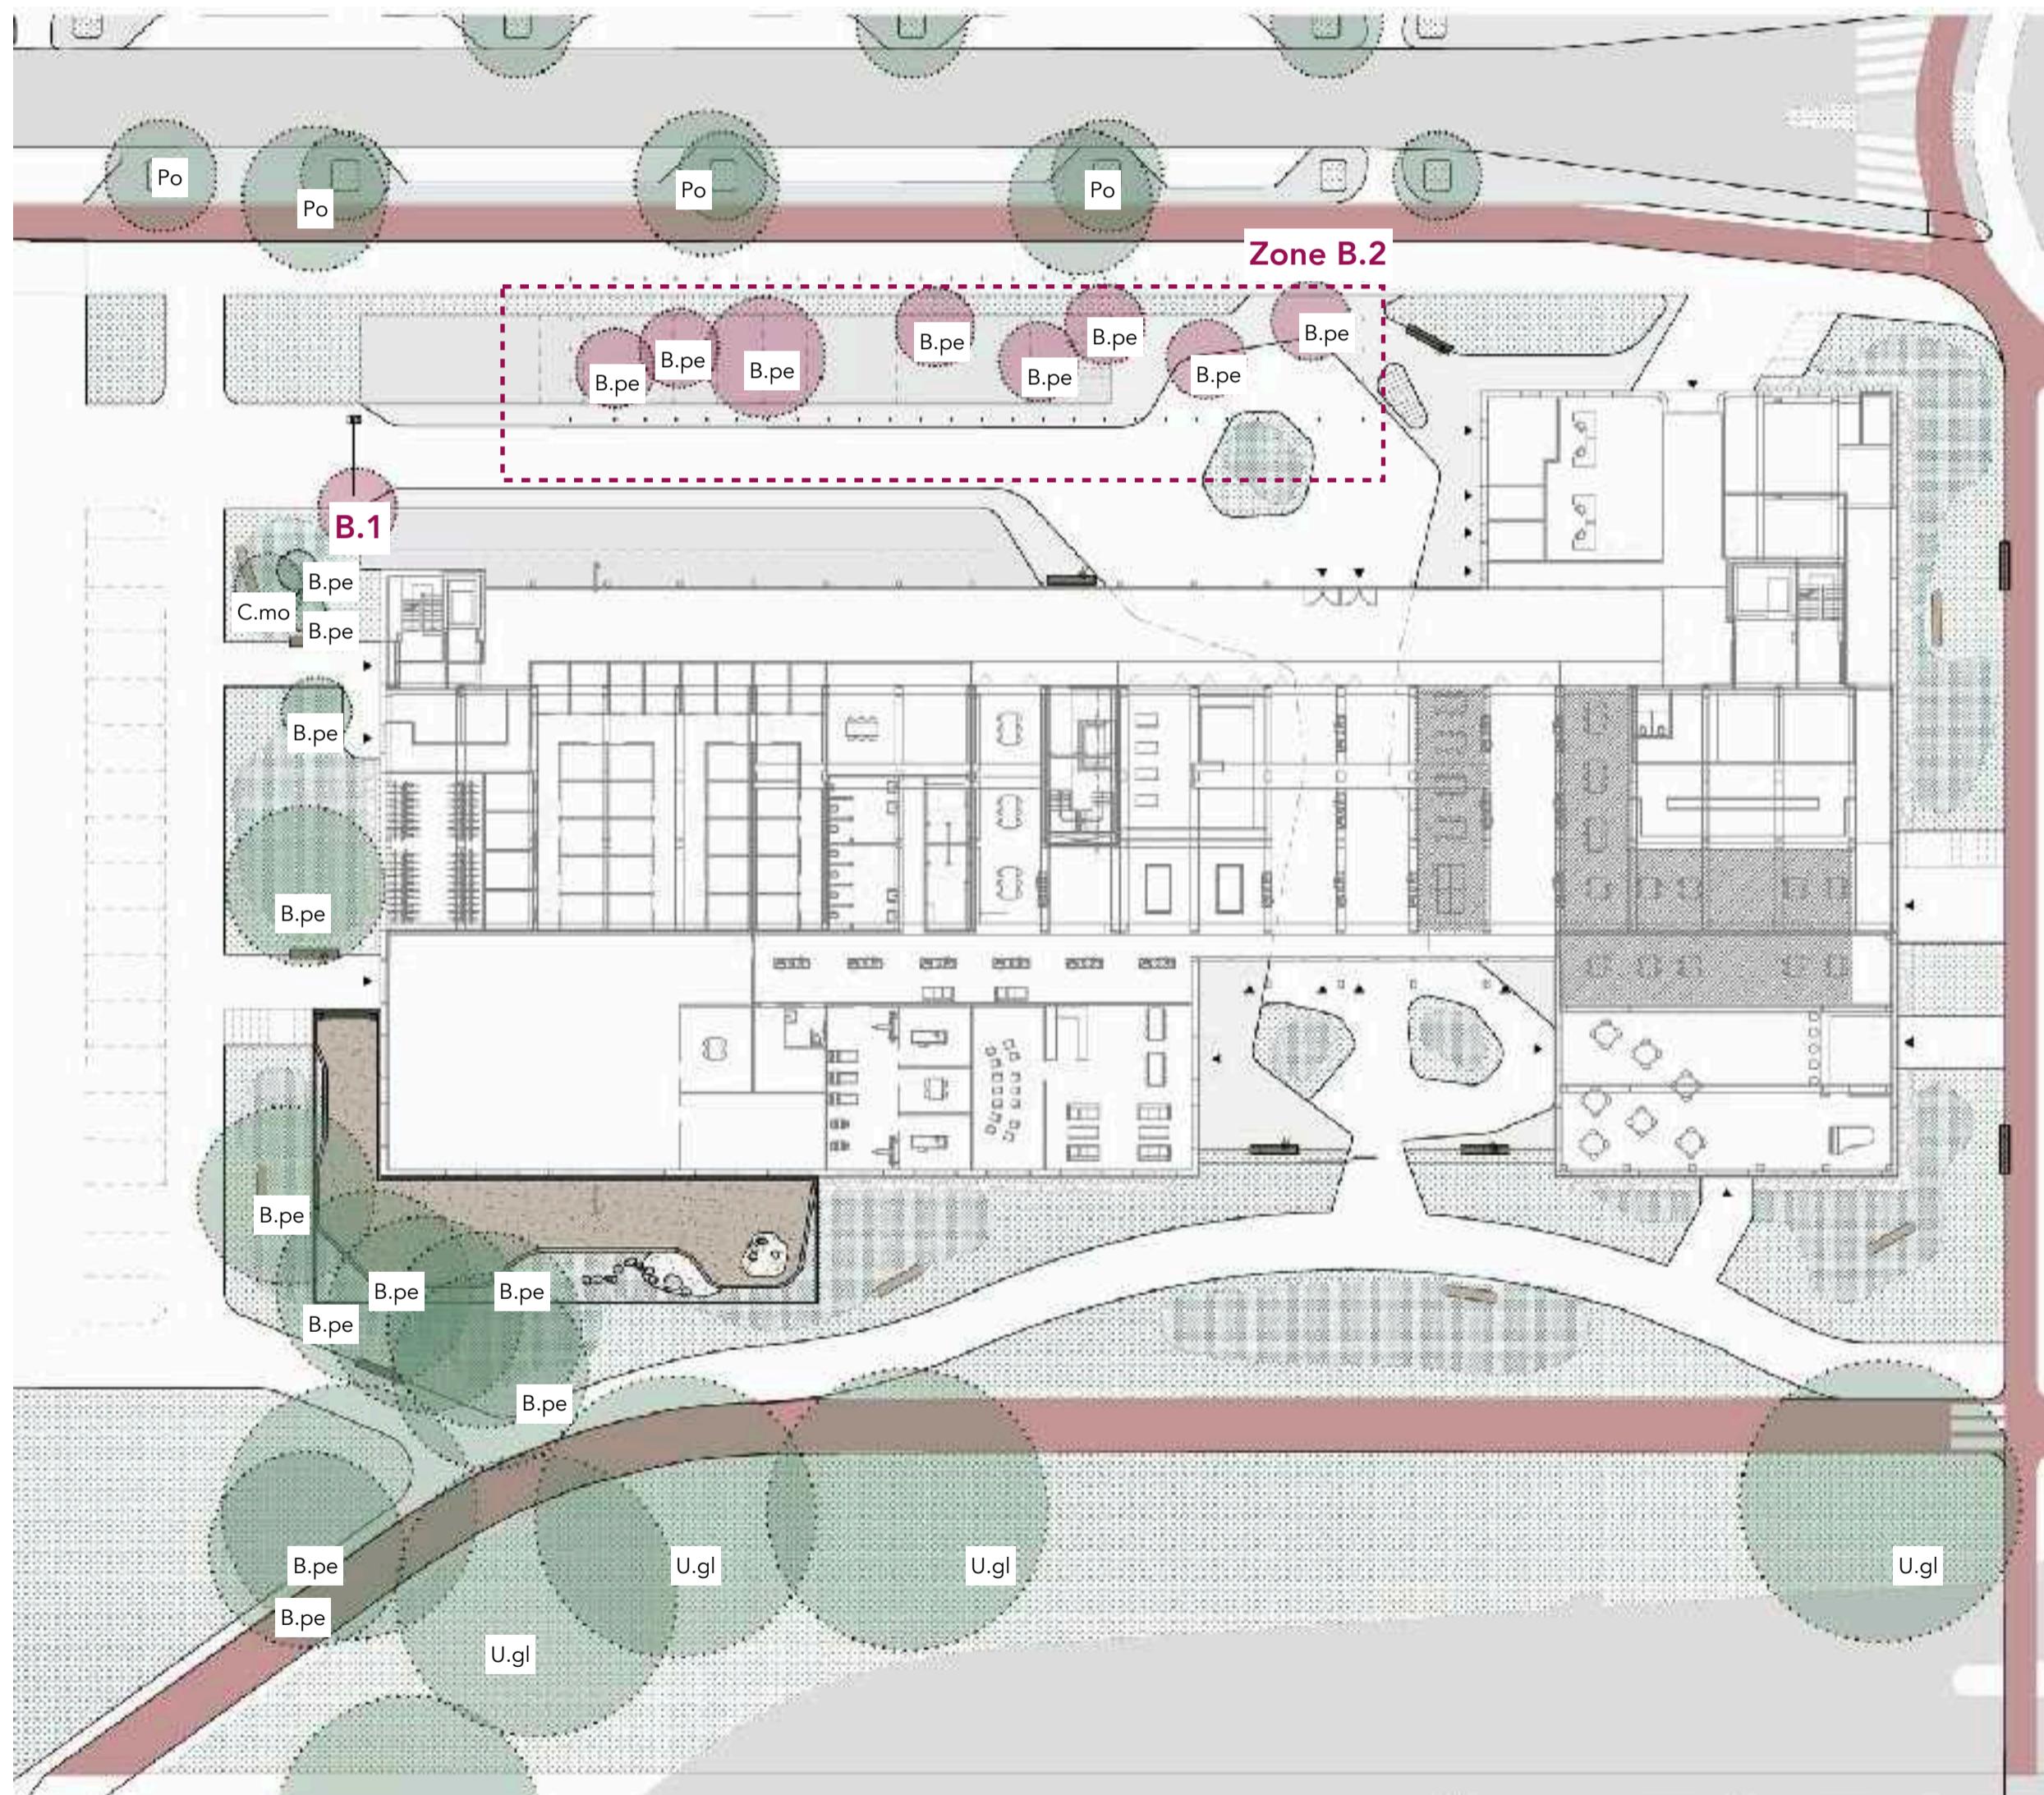

DISCLAIMER • Drawing measurements are approximate and are for illustrative and consultative purposes only. • Contractors and manufacturers shall verify and be responsible for all dimensions and conditions on the job and inform MOSS of all variations from the drawing prior to performance of work. • These designs have been generated for the clients listed in the project name and are not to be used, reproduced, copied or distributed for any other project without written permission from MOSS Amsterdam. • MOSS shall first see and approve contractors full size shop drawings prior to any fabrication. • The design drawings herewith represent design intent only. • It is the responsibility of the fabricator to verify and insure structural integrity of the design with a licensed structural engineer, and assure that all local codes and regulations are fulfilled. • The fabricator has the final responsibility for a full working landscape / garden. • Use of these designs constitutes compliance with the above terms.

**OPMERKING**

Bomen worden zo groot als ze kunnen, zolang ze maar voldoende wortel- en kroonruimte hebben. Ze zullen zich aanpassen aan de ruimte waarin ze staan en met een beperkte wortelruimte zullen ze kleiner blijven dan wanneer ze in de volle grond staan. De bomen zijn zorgvuldig geselecteerd zodat ze niet tegen de gevel aan komen.

## BOMEN OVERZICHT

### BESTAANDE SITUATIE BOMEN

### VERANDERINGEN IN DE SITUATIE VAN DE BOMEN

In de site, gebaseerd op <https://maps.amsterdam.nl/bomen/?LANG=nl> rapport, zijn er op dit moment:

- B1 Een boom uit 1981, een *Crataegus monogyna*. Op basis van de regels voor het compenseren van het aantal bomen moeten er 5 bomen worden vervangen vanwege de leeftijd.
- ZONE B.2 Het bestaat uit 8 bomen die in 2005 zijn geplant. Als compensatieregel moeten er twee worden gecompenseerd voor elke verwijderde boom.

In totaal worden 21 nieuwe bomen geplant.

#### Zone B.2

De bomen in zone B.2 zijn geplant in 2005. De rest dateert van 1981.

#### LEGENDA

- Te bewaren
- Om te worden verwijderd
- Nieuwe positie voor bestaande boom
- *A.ps Acer pseudoplatanus*
- *B.pe Betula Pendula*
- *Po Populus*
- *P.fr Pterocarya Fraxinifolia*
- *T.com Tilia Cordata*
- *U.gl Ulmus Glabra*
- *C.mo Crataegus Monogama*

#### OPMERKING

MOSS stelt voor om bestaande bomen te hergebruiken/verplaatsen. Groenaannemer moet controleren of het verplaatsen van bomen haalbaar is.

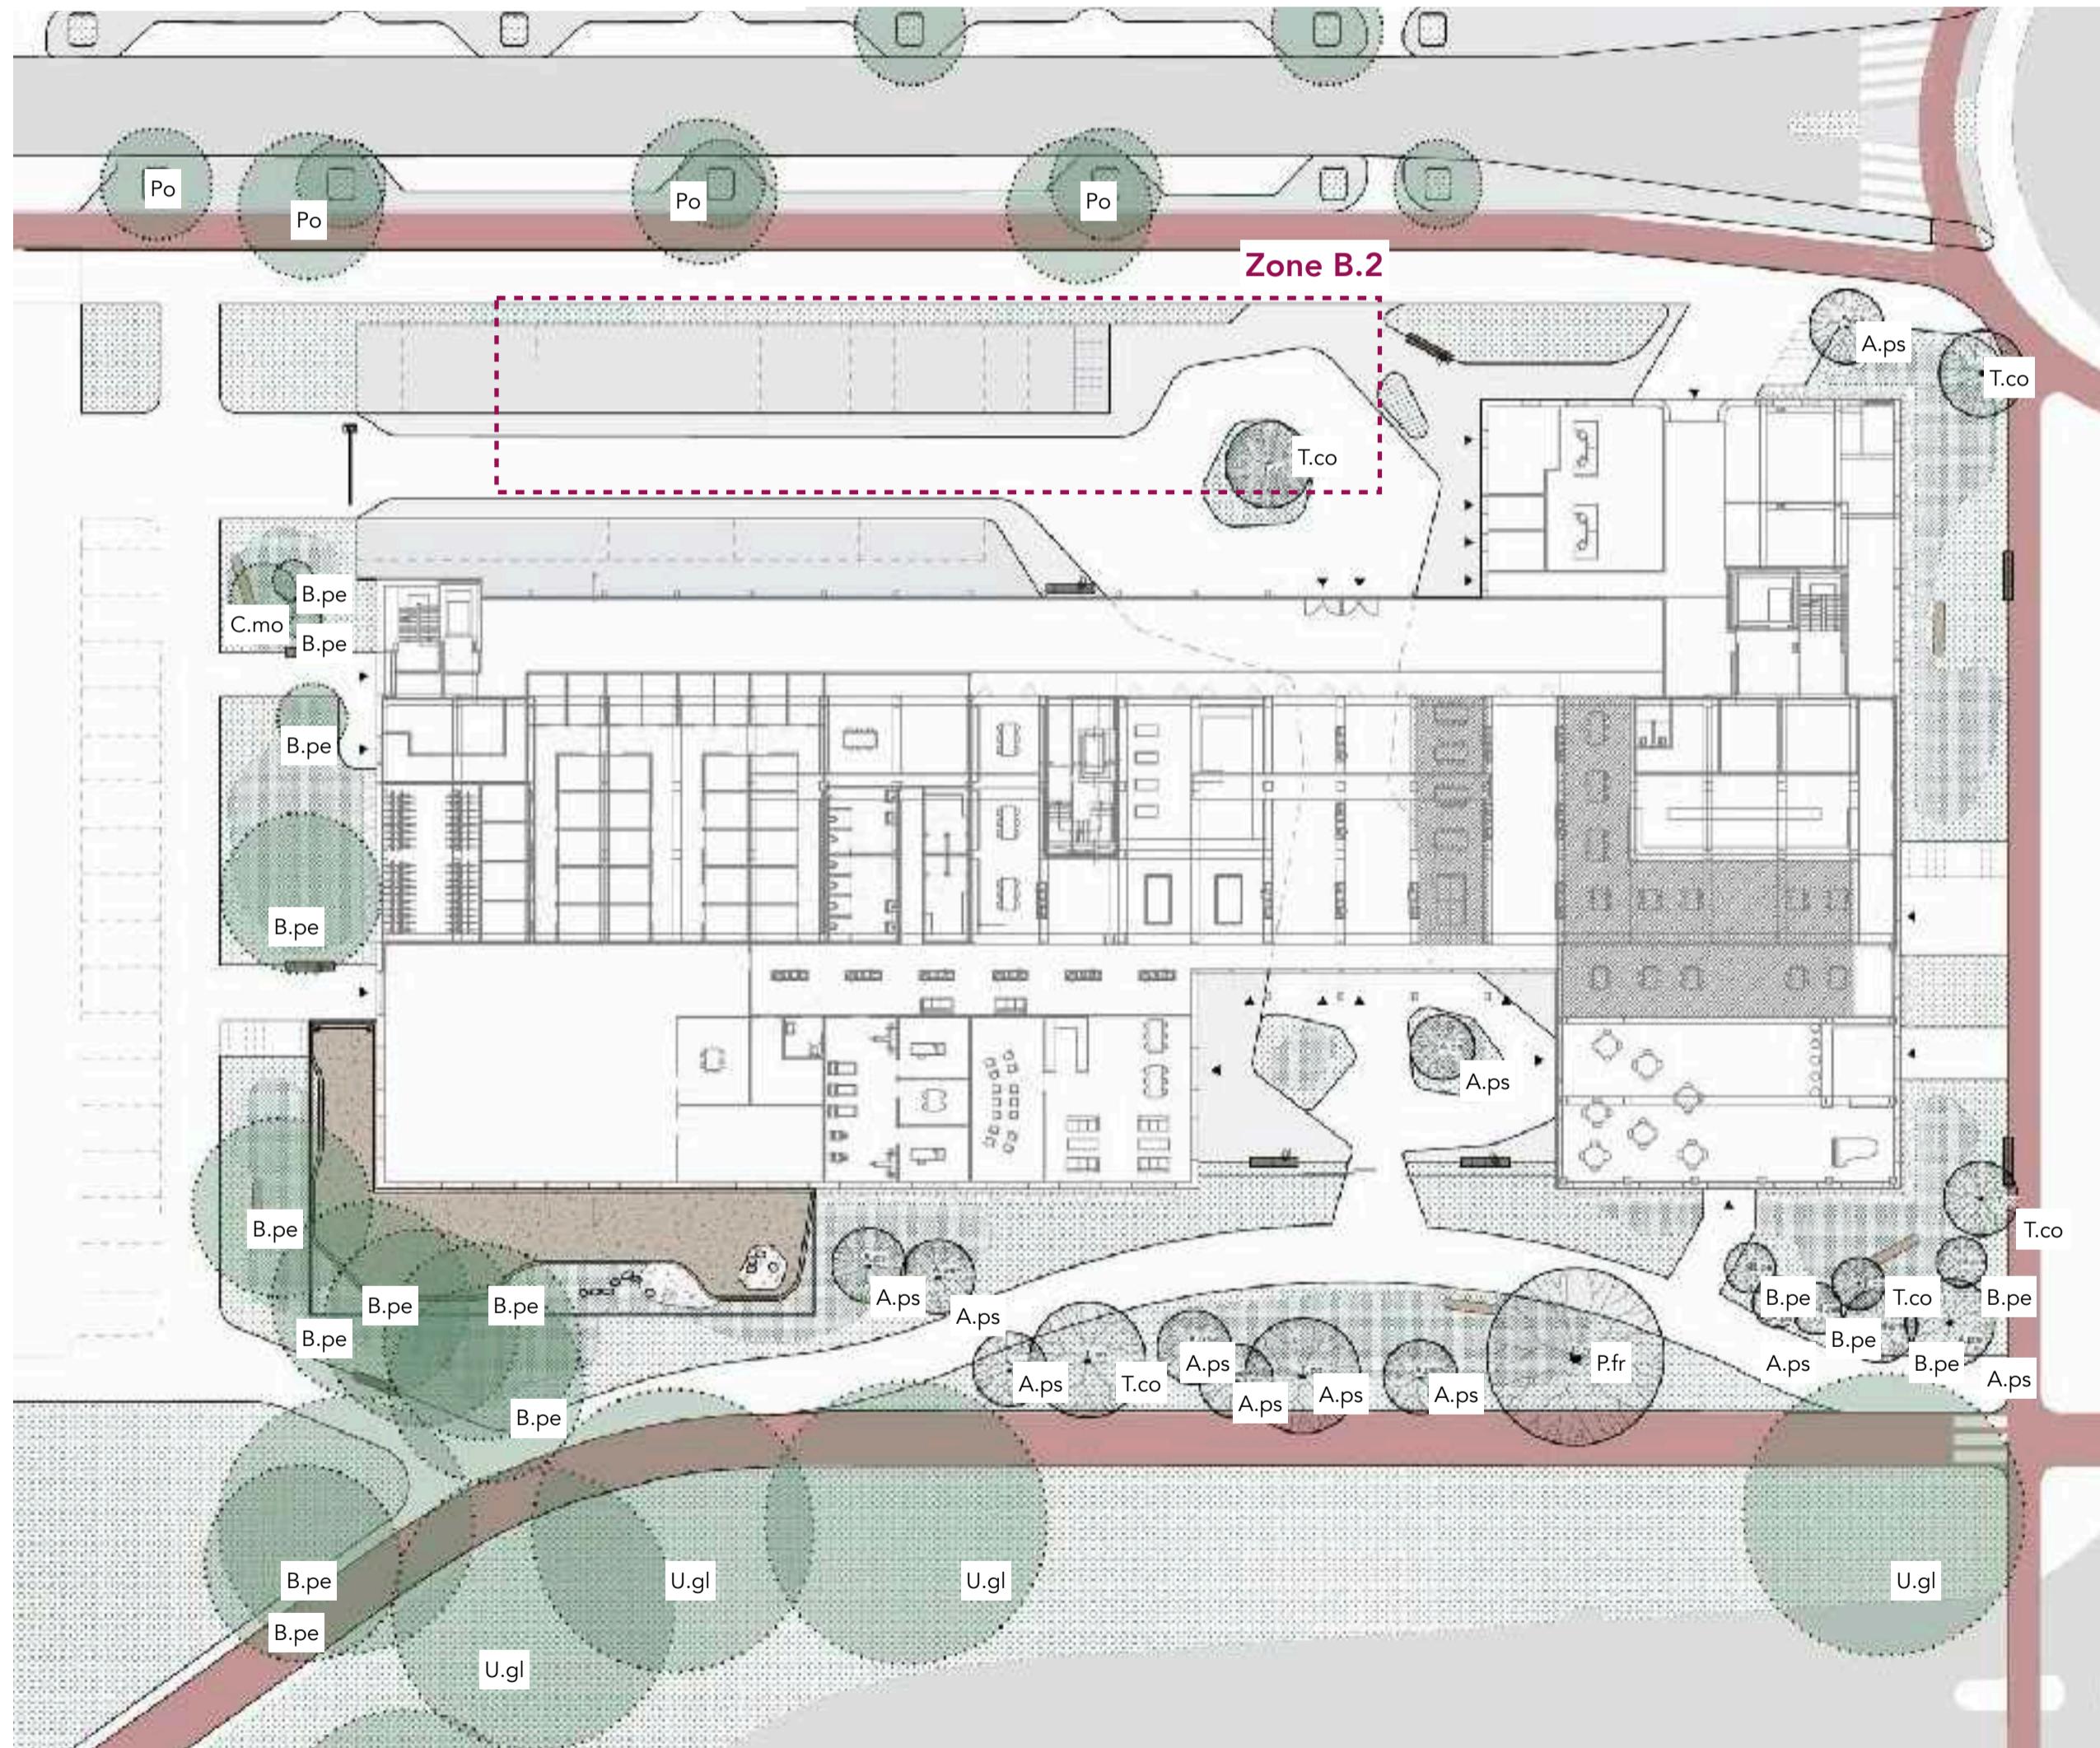

Posities van bestaande bomen worden geschat op :  
<https://maps.amsterdam.nl/bomen/?LANG=en>

MOSS stelt voor om de exacte positie ter plaatse te verifiëren.

## BOMEN OVERZICHT

### BESTAANDE SITUATIE BOMEN

### NIEUWE SITUATIE VAN DE BOMEN

In de site, gebaseerd op <https://maps.amsterdam.nl/bomen/?LANG=nl> rapport, zijn er op dit moment:

- B1 Een boom uit 1981, een Crataegus monogyna. Op basis van de regels voor het compenseren van het aantal bomen moeten er vijf bomen worden vervangen vanwege de leeftijd.  
Het is vervangen door een T.co en vier A.ps.
- ZONE B.2 Het bestaat uit 8 bomen die in 2005 zijn geplant. Als compensatieregel moeten er twee worden vervangen voor elke verwijderde boom.  
Zij worden vervangen door vier B.pe, een P.fr, zes A.ps en vijf T.co.  
De verplaatsing van oude bomen in het zuidoosten van het gebouw kan worden geëvalueerd. De kosten en baten van deze operatie moeten worden bepaald.

In totaal worden 21 nieuwe bomen geplant.

Het aantal geplante bomen maakt hetzelfde mogelijk als in de situatie vóór het project. Hun positie werd bestudeerd aan de hand van de Puccinimethode en er werd gezorgd voor de juiste afstand tot leidingen en kabels die zich onder de grond bevinden.

### Zone B.2

De bomen in zone B.2 zijn geplant in 2005. De rest dateert van 1981.

RIEKERHOF

# MATERIALISATIE EN STRAAT MEUBILAIR BEGANE GROND

## MATERIALISATIE

### VERHARDING: OPTIE A

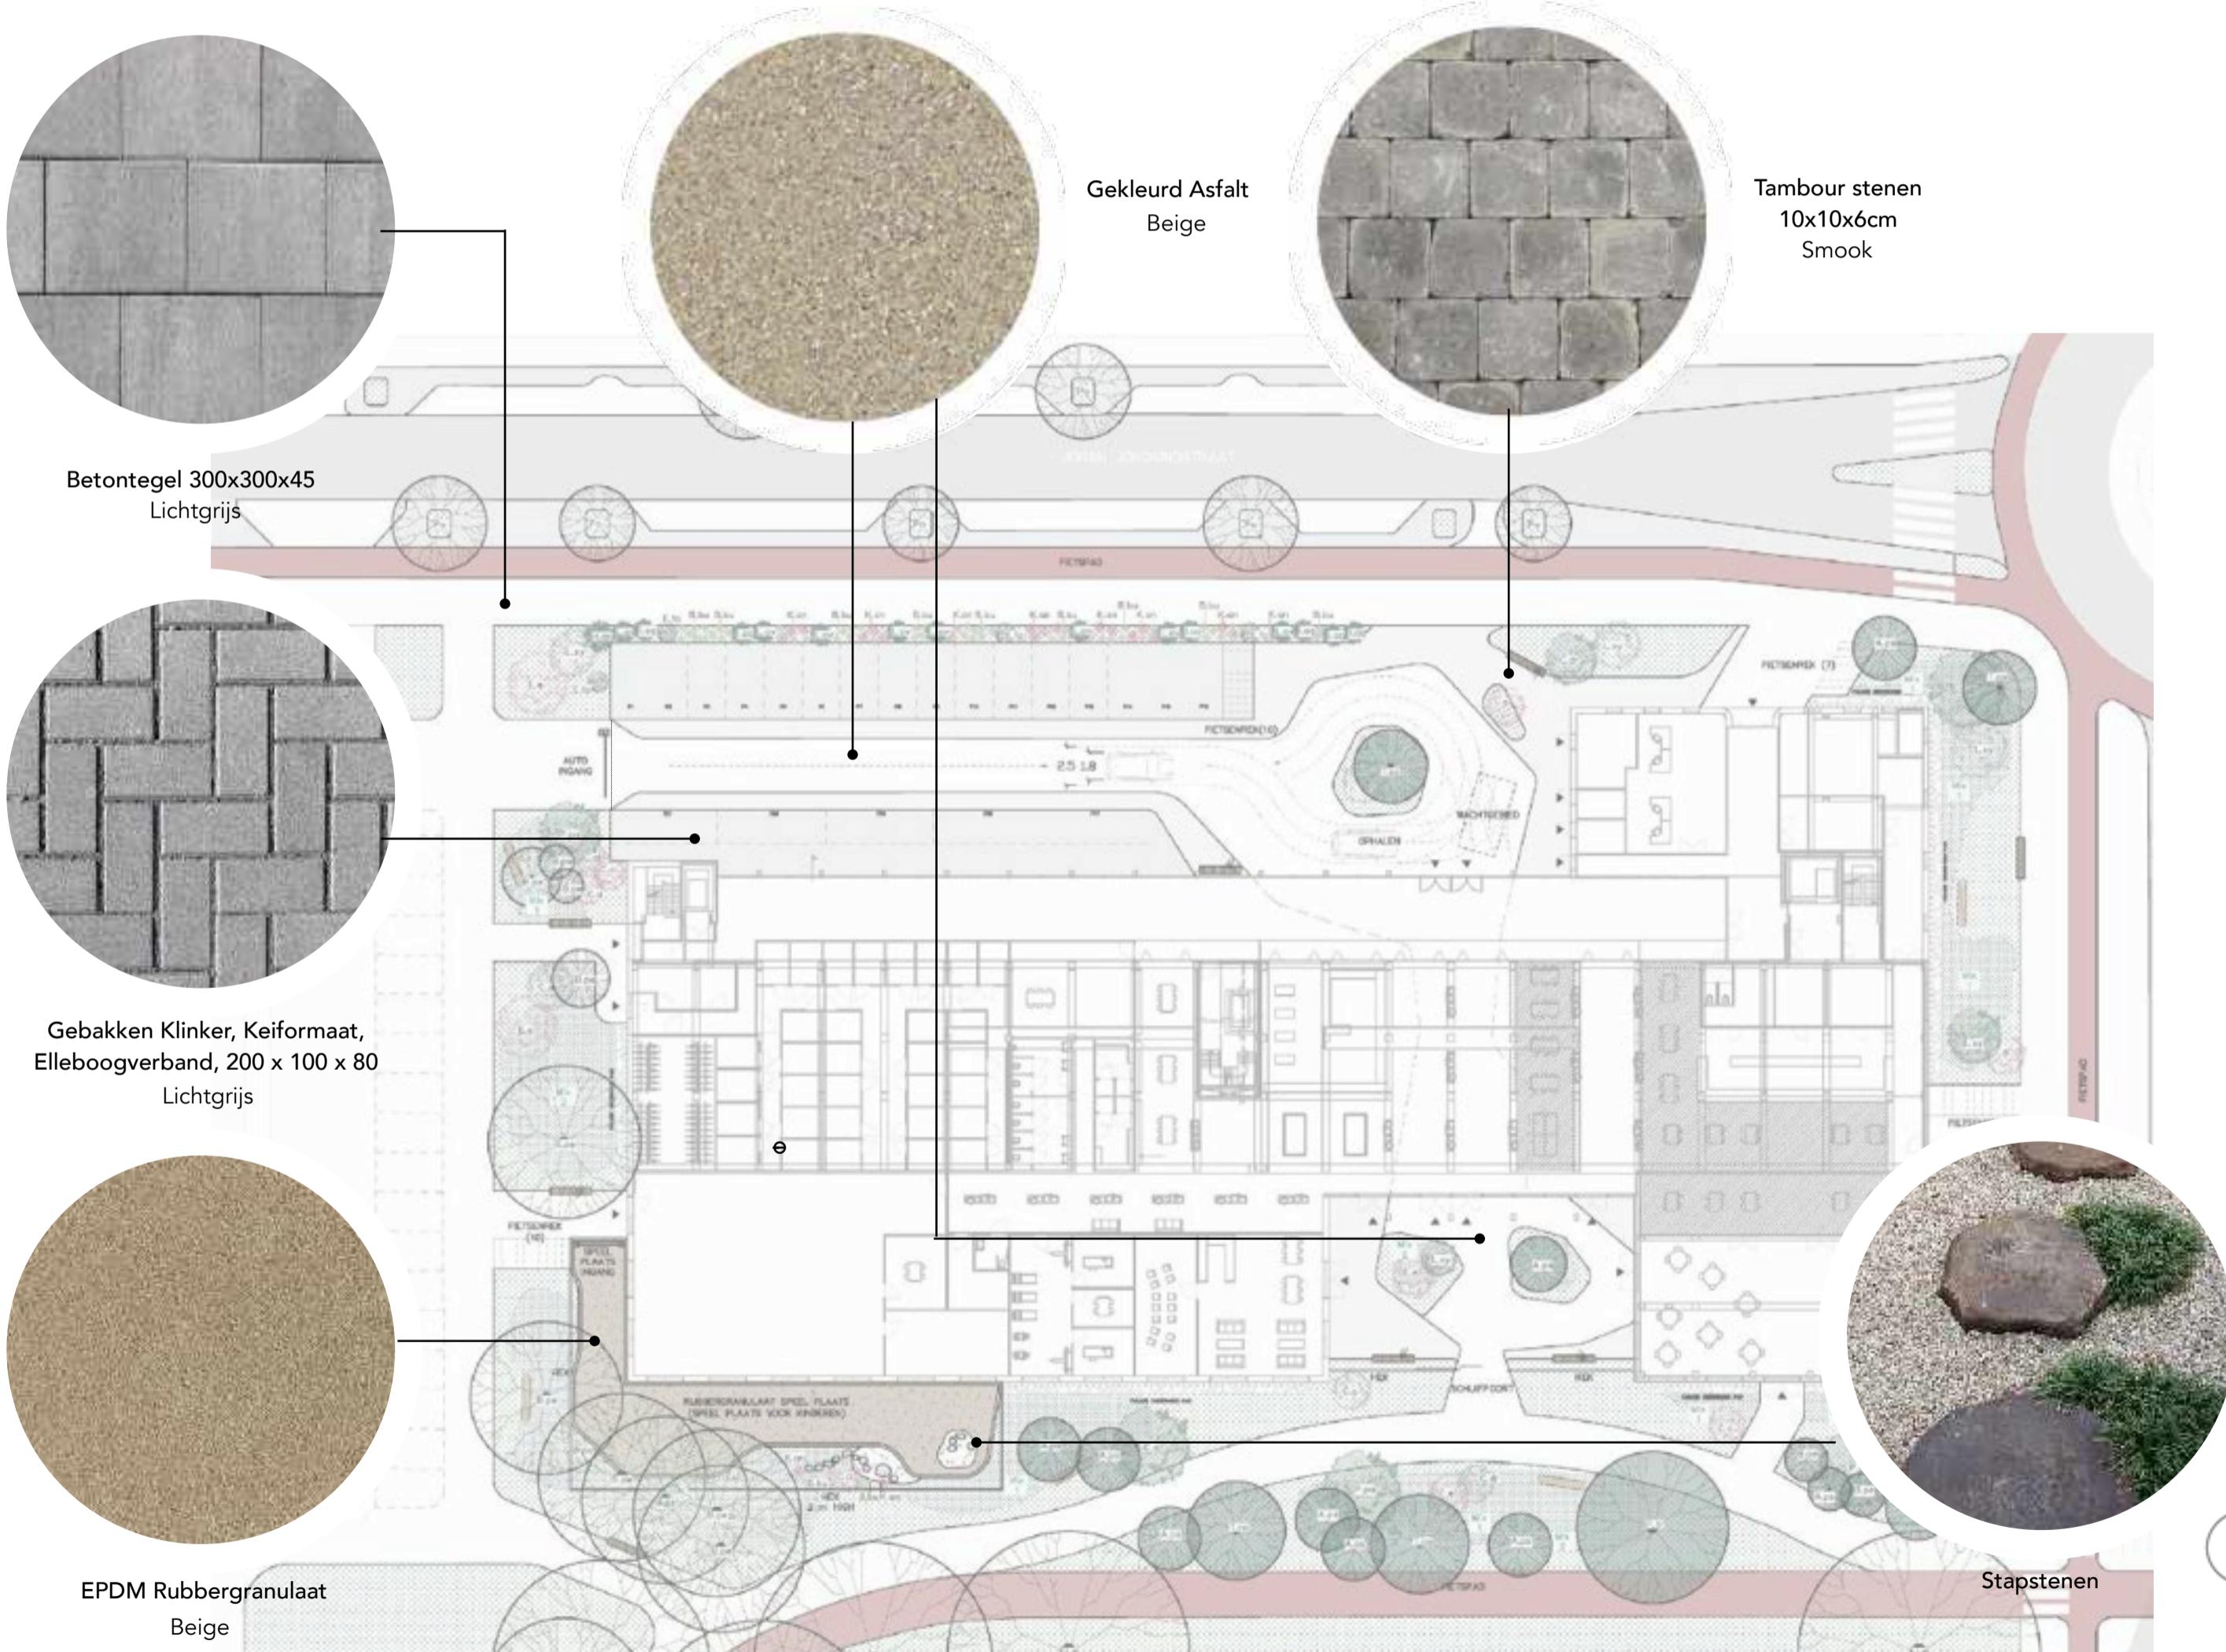

Deze ontwerpoptie zorgt voor een naadloze stroom door gebruik te maken van het bestaande materialenpalet.

**Let op:** Straatstenen kunnen na verloop van tijd verplaatsen door de wrijving van auto's op de rotonde waardoor de stenen kunnen verschuiven. Dit moet op de juiste manier worden geconstrueerd.

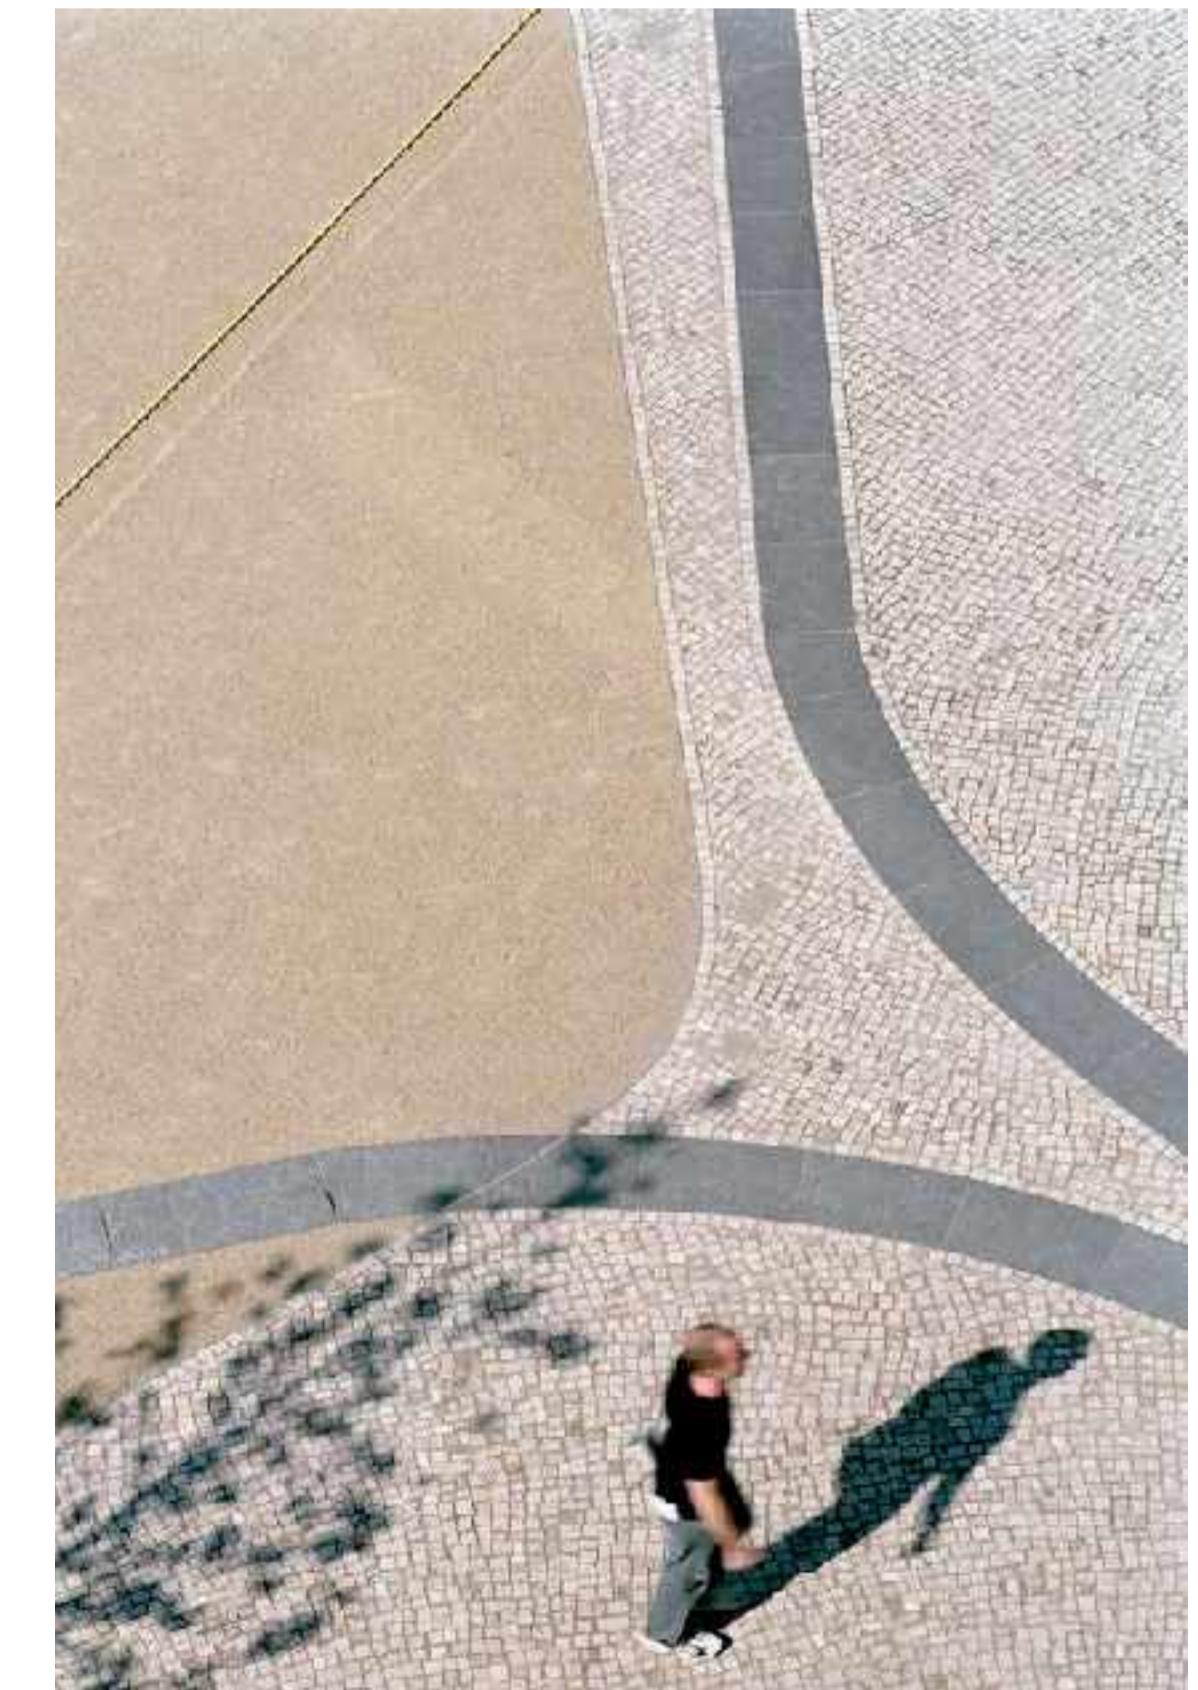

## MATERIALISATIE

### VERHARDING: OPTIE B

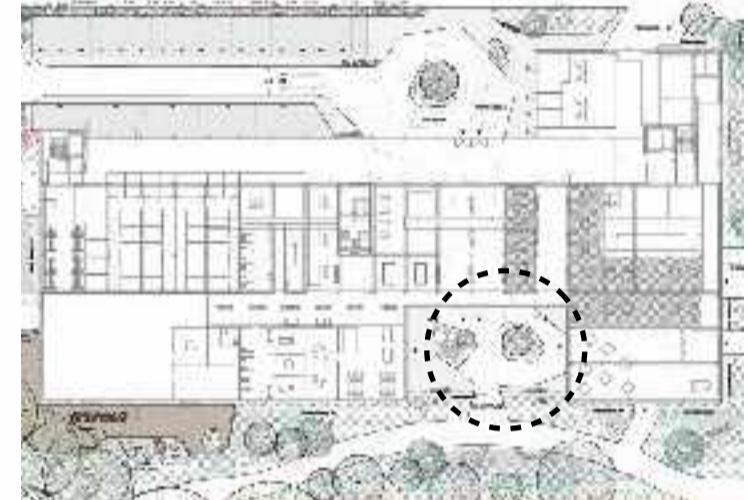

Dit ontwerp stelt een nieuw materiaalpalet voor met aardse en warme tinten. Aangezien de bestrating van de gemeente in de winter glad kan zijn, raden we deze optie aan

## MATERIALISATIE

### DETAIL A

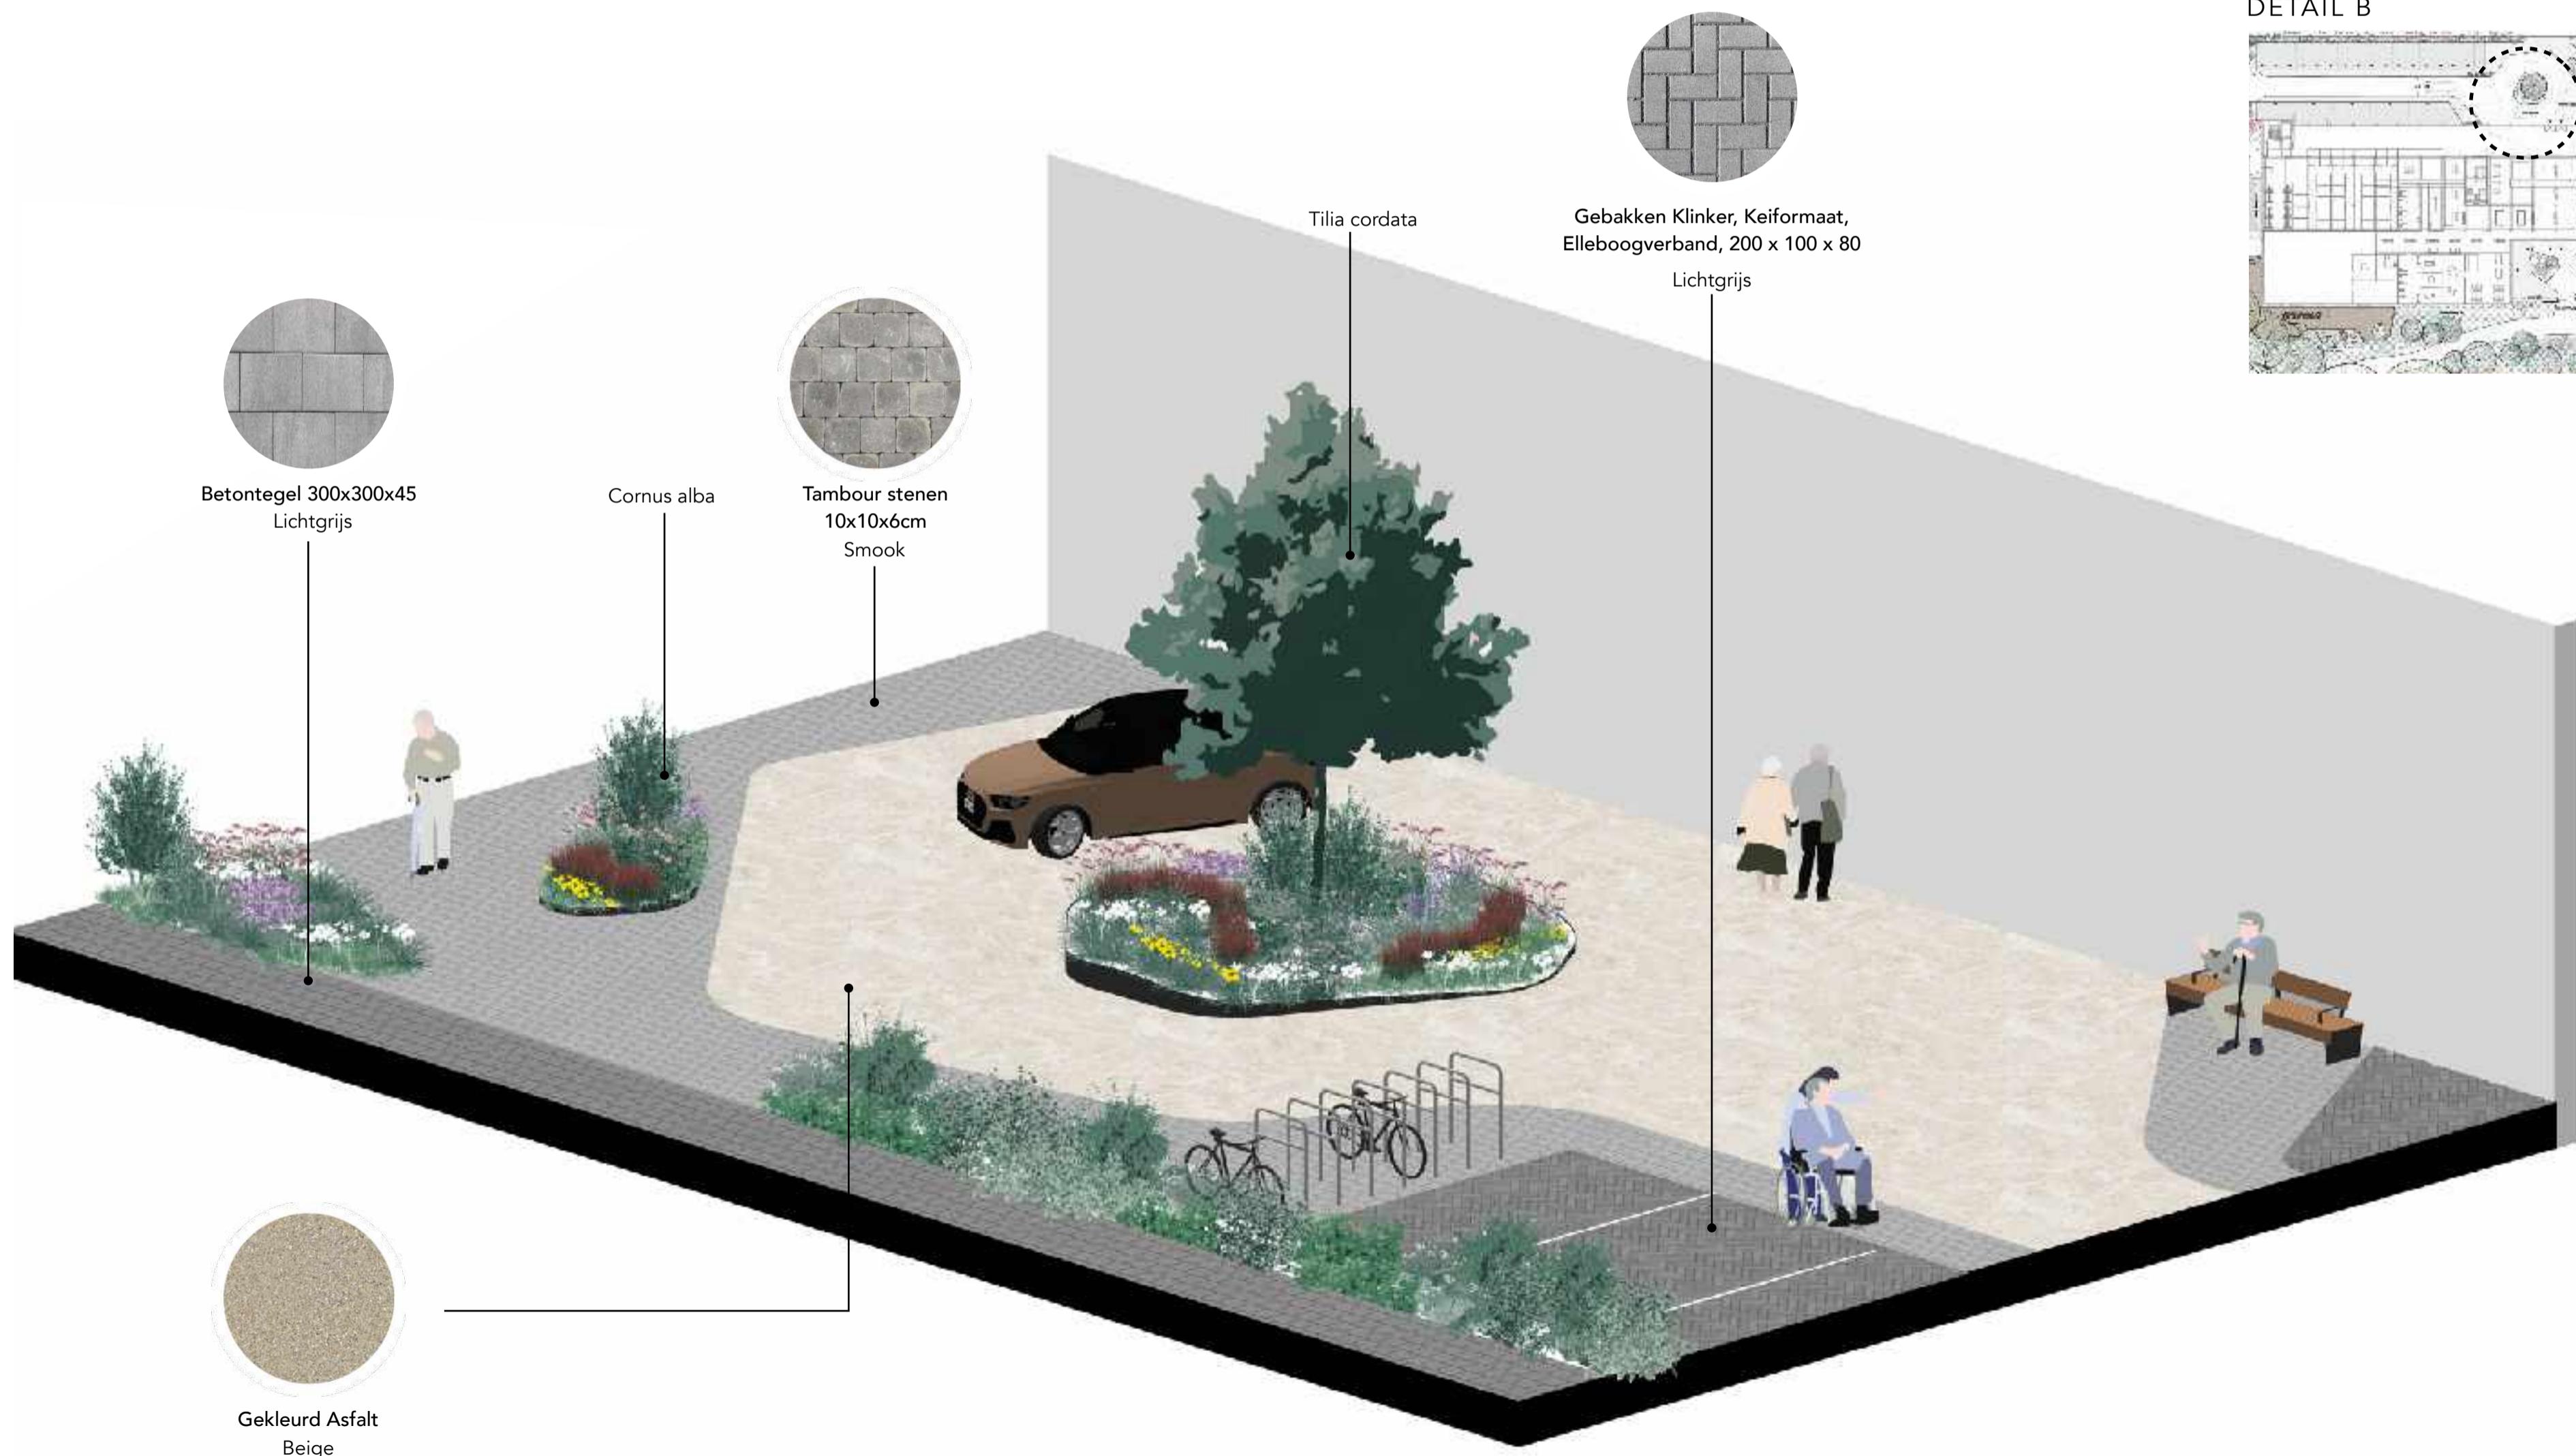

DETAIL A

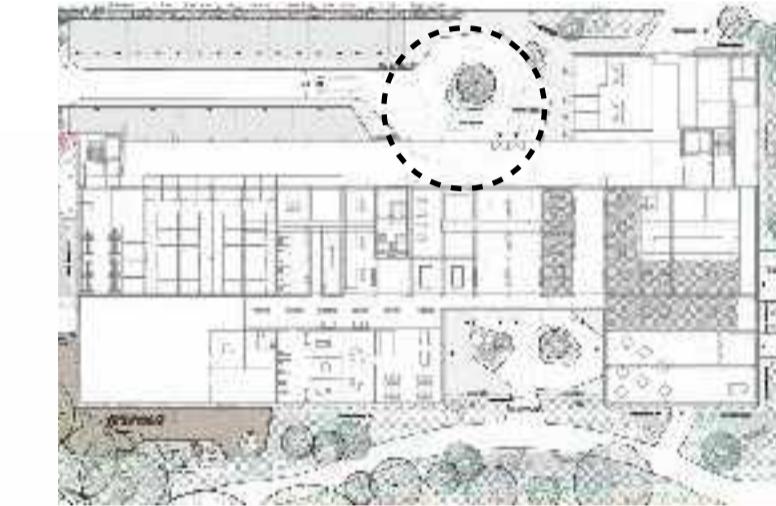

DISCLAIMER • Drawing measurements are approximate and are for illustrative and consultative purposes only. • Contractors and manufacturers shall verify and be responsible for all dimensions and conditions on the job and inform MOSS of all variations from the drawing prior to performance of work. • These designs have been generated for the clients listed in the project name and are not to be used, reproduced, copied or distributed for any other project without written permission from MOSS Amsterdam. • MOSS shall first see and approve contractors full size shop drawings prior to any fabrication. • The design drawings herewith represent design intent only. • It is the responsibility of the fabricator to verify and insure structural integrity of the design with a licensed structural engineer, and assure that all local codes and regulations are fulfilled. • The fabricator has the final responsibility for a full working landscape / garden. • The fabricator is responsible to fabricate gardens of a high quality. • Use of these designs constitutes compliance with the above terms.
