Grasvlakken inzaaien met Barenbrug R1 (of gelijkwaardig) zaadmengsel

The figure displays a detailed site plan for a residential development, likely a subdivision or cluster housing project. The plan includes the following key elements:

- Building Footprints:** Various building types are represented by different colors and patterns, including orange, yellow, grey, and green. A large rectangular building with a yellow hatched pattern is prominent in the center.
- Green Spaces:** Green areas are shown in shades of green, including a large central green space with a walking path and smaller plots along the perimeter. A red curved line indicates a walking or cycling route.
- Infrastructure:** Infrastructure is depicted with blue lines representing roads and water features, and grey lines representing paths and boundaries. A red pipe is visible on the left side.
- Landscaping:** Landscaping is indicated by green dots scattered throughout the site, particularly around the perimeter and in the central green space.
- Scale:** A scale bar at the bottom left shows distances from 0 to 100 meters. A north arrow is also present.
- Legend:** On the right side, there are two columns of icons representing different building types, such as houses, garages, and commercial units, with labels like "Wohnung", "Garage", and "Geschäft".
